FIRST IN SERVICE TO READERS

ANTIOCH, ILLINOIS, THURSDAY, JANUARY 5, 1950

FIRST IN RESULTS TO ADVERTISERS

NUMBER 23

## Wm. E. Schroeder To Deed Property To Twp. Library

### Landmark at Wms. St. and Main St. to House Library

Announcement was made today that the Antioch Township Library Board had accepted a gift from Wm. E. Schroeder of the property known as the E. B. Williams home, located adjacent to the Antioch Scout home and also adjoining the property recently deeded to the village for park purposes.

The property was originally owned by the family of the late C. K. Anderson, who had long had the dream of a village and civic park and library on the block of land lying north of Williams street and east of main street.

The gift, which includes the large home and several smaller buildings, will be used to house the library. Most of the smaller buildings will be torn down and disposed of.

Mr. Schroeder said today that all that remains to be done to complete the transfer of the property is a small amount of legal work in preparation of the deed to the property.

## Fire Department Called 73 Times During 1949; Losses Totaled \$36,290

The Antioch Fire department answered 73 fire calls in 1949, the report of Secretary C. B. Shultis to the village board announced.

Of this number 56 were calls in the district and 11 were in the village. Others listed were: Newport township, 2; Salem Township, 2; west of Fox river on Rte. 173, 2.

Of the 11 calls in the village four were grass fires and the rest on property valued at \$104,900 with a loss of \$260.

In the district 32 of the 56 calls were grass fires, and the rest on property valued at \$205,50 with a loss of \$36,000.

The largest losses were at the Hills and Paddock farms.

The average attendance of firemen at fires was 12.

The department spent \$2,091.17 on the new fire station which includes the cost of paint, hardware, furniture, refrigerator, hot water heater, kitchen equipment, and refinishing of the exterior.

## Antioch High Teams Expect Close Games With Northbrook High

Northbrook High with one less victory than Antioch but with a more imposing scoring and defensive power will meet the Sequoias here tomorrow evening.

At the same time the underclassmen of the two schools will clash in an opener with the Papooses favored to win.

Two weeks ago Bensenville was only able to beat Northbrook 45 to 39, and the second team edged out a victory over Northbrook's sophomore-freshmen 21 to 19. This means tough games for the Sequoias.

During the holidays Ela beat Grayslake at the invitational tournament at Wauconda to take the tourney honors. Wauconda beat Grant in the consolation game.

The present standing of the Northwest conference is:

**Returns to University**  
Miss Jerry Gresens returned to Chicago to resume her music activity at DePaul University after spending 10 days with her parents, Mr. and Mrs. Edward Gresens, 1050 Bishop Drive, for the holidays.

## Delinquent Water Users Advised to Pay Under Threat of Disconnection

Complaint that 40 water users are delinquent in sums totaling more than \$600 was revealed by trustees of the village board after an inquiry was made as to the small surplus in the water fund.

Walter I. Scott, superintendent, was told that the bills must be paid otherwise the village has no other recourse than to shut the water off. One bill was as much as \$75.

It was repeated by the trustees that the owner of the property is responsible for the payment of the water bills and will be billed if the tenant fails to pay.

## Borovicka to Convert Second Floor of Store Into 18 Office Rooms

### Will Build Extension to Rear at Total Cost of \$36,000

George Borovicka, proprietor of Reeves Walgreen drug store, obtained permits from the village board Tuesday evening to convert the second floor of his business building to office rooms with a sizeable addition on the rear, and to build a frame residence on the east edge of the village.

He estimated the cost of the business improvement at \$36,000 and the five-room frame residence at \$10,000.

Through the two-story addition he will obtain space on the first floor for storage for his drug store and on the second floor for some of the 18 rooms that can be converted into office suites in any combination desired.

An automatic elevator just inside a small lobby at the Main st., entrance will take people to the second floor lobby and the rooms will be reached through a hallway extending down the center.

There will be wash-rooms in the rear.

The whole building will be air conditioned and Borovicka said that a two-inch water inlet would be needed to supply water for the cooling system.

He said that work would be started as soon as satisfactory bids which he is now seeking are received.

Office space for business and professional men is needed in Antioch and Borovicka believes his building will relieve the shortage.

Commenting on the new house he is preparing to build just north of Depot st., at the village limit, Borovicka said it will be 42x26 feet in size with a full basement and will have a living room 16x25.

The place will be known as Lone Tree Point and the grounds call for extensive gardens and an orchard.

A permit was also issued to Earl Horton to construct a five-car garage at his home on North ave. It will be 26x60 feet in size and will be of cement block.

## District Judge Advocate To Address Auxiliary of Antioch American Legion

The women of the American Legion Auxiliary believe that the peace of the world, the success of the Atlantic Pact and the United Nations depend upon the strength of the United States.

Mrs. Burt Anderson, Unit National Security chairman, in talking about the Legislative program of the Legion which the Auxiliary has also adopted, states that it deals chiefly with rehabilitation, National security and Americanism.

The three point program will be explained and discussed at a meeting which will be held at 8 p. m. Friday, Jan. 13, in the Legion home by Bernard C. Schiff, Deerfield judge advocate of the Tenth District, American Legion.

## Cmdr. Crowley to Address Holy Name Society Sun.

St. Peter's Holy Name Society of Antioch will receive Holy Communion at the 8 o'clock mass Sunday.

A breakfast meeting will be held immediately after the mass for all men of the parish.

Cmdr. J. D. Crowley, U. S. N. veteran sub battle ship and destroyer commander will be the guest speaker. Cmdr. Crowley is one of eight survivors of the U. S. S. Flyer sunk in 1944.

## New 10 P.M. Curfew For Children Under 16 Adopted as Village Law

### Parents Held Responsible With Fine From \$5 To \$200

Antioch now has a curfew law. An ordinance passed Tuesday evening by the village board and becoming effective with the legal publication today makes it necessary that all children under 16 years of age be off the streets of Antioch between 10 p. m. and 6 a. m. unless accompanied by a parent or by someone over 21 designated by the parent or guardian to accompany them.

The law places the responsibility not only on the child but on the parent with a penalty for willful violation ranging from \$5 to \$200.

For the first offense the parent or guardian of the child is given notice and the child warned. On the second offense the child shall be apprehended as a juvenile delinquent and brought before the county court.

The child cannot be placed in confinement unless it is with the parental wish, or where the parent has refused to take responsibility.

Where the parent permits the child to violate the ordinance a second time, he is subject to fine.

The village trustees said the curfew was not meant to deal with children attending meetings or school affairs of some kind and going straight home even though after 10 o'clock, but is meant for those who make a practice of loitering on the streets and getting into mischief.

## Volunteers Listed for March of Dimes Drive To Reach Higher Goal

With the opening of the March of Dimes campaign but 10 days away preparation is being made to reach Antioch's goal which is far more than last year owing to the great increase in polio cases.

About \$1,400 was collected in 1949 through the regular March of Dimes campaign and the emergency drive, but this amount is far short of the actual cost, Ed Gresens, chairman, announced.

When polio struck Antioch township last year, Gresens' own son, Ralph, was the first case. Before that there were five cases in the entire county. Antioch's fourteenth victim was the county's ninety-first.

Following Gresens the cases were Douglas Beatty, David Beattie, Diane Castle, David Lewin, George Lystlend, Jack Nelson, George Nelson, Joan Putman, Rosemary Wolf, Eugene Dorsey, Jack Dorsey, Marcelle Dorsey, Warren Wells and Eugene Hucker, Jr.

The following persons have volunteered their time and effort in the drive soon to start:

Mrs. Frances Fred Stahmer, Curtis Wells, William Dorsey, George Masopust, Don Anderson, William Hanson, Margaret Quilly, Donald Stowe, Fred Pierce, Luster Badger, Hans Von Holwede, L. J. Hybarger, L. R. Van Patten, Archie Lokke, M. Haydon, Anton Novak, C. L. Heath, Maurice Radtke, Lester Osmond, Morris Pickus, Eugene Sheehan, Wendell Nelson, Lester Nelson, Elmo Edwards, Eleanor Rogers, Carl Wolfenbarger, Art Meyer and Eugene Hucker.

## Grade School Conference Resumes Play This Week

The Northern Lake County Grade school conference will resume action this week after laying off for Christmas and New Year holidays. On Jan. 5 Fox Lake will meet the Antioch Grade school here, on the following evening Grunee will play at Lake Villa and Round Lake will take on Grayslake at Round Lake. Allendale will play a non-conference game with Gavin at Allendale.

School	Won	Lost
Lake Villa	2	0
Allendale	2	0
Antioch	1	2
Grayslake	1	2
Grunee	0	0
Fox Lake	0	0
Round Lake	0	2

**Lions Club Donates**  
The board of directors of the Lions club recently voted a donation of \$500 to the Lella Anderson Memorial Foundation for the Scout house, and \$500 for the Lions club Rescue Squad fund.

## Methodist Church Will Start Financial Drive For Building Saturday

### A. L. Stevenson Will Arrive Saturday to Lead in Campaign

The Rev. A. L. Stevenson will arrive Saturday, to take charge of the Methodist church financial campaign.

He will begin his three week stay with a meeting with the building committee. The following day he will deliver the Sunday morning sermon. The sermon will be entitled "The Power to Achieve the Impossible." The choir will sing under the direction of Charles Watson, and Clarence Olson will be the morning soloist.

The campaign is to raise funds for the new proposed addition to the church which will be used mainly as an addition for church school rooms and recreation facilities. The new building will consist of some 26 individual class rooms and a gymnasium which will include a stage at one end with dressing rooms. There will be a new modern kitchen on the second floor.

The gymnasium will have a seating capacity of over 250. The new heating plant is being designed to heat both the old building as well as the new addition.

The period from Jan. 7 to Jan. 22 will be devoted to this crusade with all church activities being curtailed during this period, including the cancelling of the regular Family Night. All efforts will be put to the great task at hand. Many of the church school classes are taking individual collections so they may donate their part to the new addition. They will make their own choice as to the selection which they wish to give to the school.

The building committee has completed its preparation for the drive. After much study the architects have been chosen. Staben & Hooper and associates of Waukegan has been selected to design the new building. The chairman of the finance committee was given to Louis Horton, who is well qualified for this difficult job. Mr. Horton is forming his finance committee and the final details connected with the work of this committee.

## Sodium Fluoride to be Given School Children To Prevent Tooth Decay

In the year-end summary of the work of the state department of public health, Dr. Roland R. Cross, director, said 1949 was marked by notable accomplishments. The action of the 66th General Assembly in extending state aid to local hospitals, making a separate appropriation for state tuberculosis hospital construction, adding to the state water board's powers, and amending the statutes relating to county health department formation was of material help to the department's general program, Dr. Cross said.

His summary points out that in 1949 Illinois began the most widespread tooth-saving campaign of any state in the nation. By the end of the current school year, some 35,000 applications of sodium fluoride will have been made to the teeth of Illinois children.

Four projects for diagnosis and treatment of heart diseases have been set up, located in Springfield, Rockford, Savanna and East St. Louis.

During the year three new cancer clinics were opened, bringing the total in Illinois up to twenty-four.

## Simonsen's Appointment As Fire Chief Given Approval by Trustees

The appointment of Edgar Simonsen as new fire chief to succeed James W. McMillen, now village president, was confirmed Tuesday evening by the village board.

President McMillen was informed that Simonsen was unanimously chosen for the post by his colleagues and he at once made the appointment. The confirmation was unanimous.

If a bad beginning means a good ending, Chief Simonsen should finish his term with a flourish. On the very day he took office an accident put the district tank truck out of commission.

Anyway, Simonsen had plenty of experience in his new job at the outset. He has the backing of his colleagues and the village board who feel he will be a big success.

## Lions to Install During Ladies Night Dinner at Hank's Restaurant Jan. 9

Officers of the Lions club will be installed Monday evening at the annual Ladies Night dinner party to be given at Hank's restaurant on Skokie highway near Belvidere rd. A floor show and a five-piece girl orchestra will provide entertainment.

The new officers are Irving Carey, president; Russell Holtz, first vice president; K. F. Deitrick, second vice president; Robert Wilton, third vice president; John Russo, secretary; George Garland, treasurer; Art Smejkal and Paul Erickson, directors; Anton Novak, Tail Twister and William Horton, Jr., Lion Tamer.

## Karl F. Wiechmann, 59 Piano Teacher Dies at Fox Lake Pupil's Home

The funeral service for Karl F. Wiechmann, 59, of Hickory ave., Fox Lake well known music teacher, who died Friday afternoon, was held at 10 a. m. Tuesday at the Fox Lake funeral home. The Rev. C. H. Arnold was in charge of the services. Cremation was at the Memorial Park cemetery, Evanston.

Mr. Wiechmann collapsed from a heart attack while seated on a piano bench beside a pupil, Beverly Rushmore, 10, at the home of the child's grandmother, Mrs. Werner Kolmodin, Lakeview ave., in Fox Lake.

The Fox Lake inhalator squad was called but he failed to respond to the oxygen treatment and Dr. B. J. Willett said that death came at the time Mr. Wiechmann collapsed.

Mr. Wiechmann had endeared himself to pupils and parents alike in his work as a piano teacher and his many public appearances in recitals with his pupils were proofs of his ability as a pianist and teacher.

He was a graduate of Illinois College of Music and taught in Chicago many years before coming to Fox Lake four years ago.

He leaves his wife, Wills, two step-daughters, Mrs. Walter Gilling of Alhambra, Calif., and Mrs. William Brezel, of Canoga Park, Calif., and a stepson, Allen Johnson, of Antioch, Calif.

## Three Firemen Unhurt In Wreck of District Fire Truck on Tuesday

### Truck Collides With Auto Carrying Three Boys On Rte. 173

Three members of the fire department escaped injury when the township tank truck crashed into a concrete culvert and was wrecked following a collision with a passenger automobile at 5:45 p. m. Tuesday.

The accident occurred a half mile west of Rte. 41 on Rte. 173 while the truck of water was being taken to the Skokie highway to fight a fire that started in a Barry Oil Co. truck from Wisconsin.

The ladder truck with Chief Edgar Simonsen and Clarence Shultis in charge had gone ahead and the 1000-gallon water tank truck driven by L. R. VanPatten, Jr., and carrying L. R. VanPatten, Sr., and Dan Sheahan was following.

At the point of the accident Kenneth Bain, 16, of Russell drove a car from a driveway into Hwy. 173 in the path of the tank truck. The fire truck struck the car sending it into the ditch and then swerved off the road in the mud of the shoulder. At this point VanPatten lost control and the truck whirled so that the rear end struck the abutment of the culvert.

The force of the impact tore the tank from its chassis and hurled it into the ditch. The chassis was a wreck, but the tank did not burst. Had the front of the tank truck struck the culvert the three men in the cab probably would have been crushed by the 8,000 pounds of water in the tank.

Bain, driver of the passenger car, said he waited for the first fire truck to pass and another passenger car but poor visibility prevented his seeing the second fire truck. He and his companions, a brother, James 14, and Norman Housely escaped injury.

The two trucks rushed to Skokie highway with the impression that a truck of oil was burning only to find that the fire consisted of a smoking wheel bearing.

It was said that the tank truck was so badly damaged that the cost of repair will be more than the cost of a new truck. An adjustment on insurance carried on it is expected soon.

## March of Dimes to Start on Jan. 16

"We need four Respirators immediately, we must have 10 hot pack machines right away, rush four Respirators for our Bulbar Polio cases."

Urgent requests like these, and hundreds more, issued daily from hospitals throughout the country, as infantile paralysis last year took its blackest toll in the Nation's history.

Every plea was promptly met by the National Foundation for Infantile Paralysis. Mr. Gresens, Antioch Township Chairman, in urging the public to contribute generously when the local March of Dimes takes place Jan. 16, 1950.

"Equipment plays a tremendously important part in fighting a polio epidemic, but it is tremendously expensive too. More than a million and a half dollars worth of equipment was dispatched to all parts of the country last summer during the record epidemic."

Now we will have to hold a tremendously successful March of Dimes in order to continue work of this sort," Mr. Gresens said.

The National Foundation, he said, maintains six centrally located equipment pools in Boston, Columbus, Atlanta, Denver, San Antonio, and Portland, Ore.

These are kept on a 24-hour alert to service emergency requests for polio equipment from Maine to California and from Washington to Florida.

He pointed out that procurement and dispatching of polio equipment is co-ordinated through a control room in New York where the up to the minute movement and location of every piece of equipment is pinpointed on huge maps.

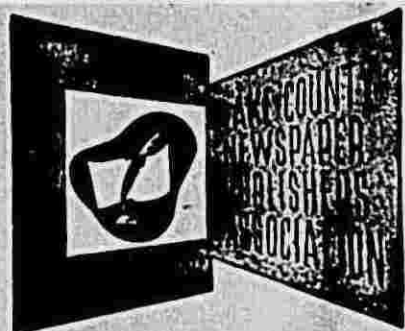

Many a race against death was won as our equipment depots sent iron lungs and other polio fighting devices roaring out across the Country's railroads, highways and airlines.

Mrs. William Thieman came home from the hospital Tuesday and is convalescing at the home of her son and wife, Mr. and Mrs. Clayton O'Haver, Mrs. Thieman will be confined to her bed for five weeks.

### Taxes Can Kill

The gravest and most far-reaching internal issue this country faces is the cost of its government. And of all issues, it is probably the least understood.

At a time when the Federal government's income is at a near-record peak, and when the burden of taxation borne by the people is without precedent in days of peace, the nation is unable to make both ends meet. It is running a heavy deficit which will be added to the towering national debt—a debt which is a direct obligation upon every man with an income, a piece of property, or material resources of any kind.

There is, of course, a glib answer to all of this. It is: "Tax the rich man and the rich business—let them carry the load for the rest of us." But the fact is that we could tax the rich into financial extinction and the proceeds wouldn't even come close to paying the bill. It is the tens of millions with moderate means—not the few with large means—who are hurt by extravagant government.

But that is not the end of the story. Something infinitely ominous is quietly happening in this country. Taxes are killing our economic growth.

A recent article in Newsweek describes this. Sales of common stock in industry largely determine whether we shall have good times or bad, an expanding economy or a static economy, more employment or less in the future. Yet, Newsweek says, last year trading in stocks accounted for only four per cent of the national income where, in the 55 years prior to 1930, it averaged more than 40 per cent. This means, the magazine goes on, that "if most of our corporations were not already in existence, it would be impossible today to create them." The money that once went into the enterprises upon which our living standards and our world leadership are built is being taxed out of existence.

This is but one illustration out of many that

could be cited. Every individual whose income is above the subsistence level knows how onerous taxes are. Practically everyone talks at one time or another about the cost of government and how something must be done. But talk is generally the beginning and the end of it.

This brings us to a fundamental fact. Wasteful, excessively costly government is simply a symptom of a condition of overwhelming significance. That condition cannot be described in cold figures. It exists in the minds and hearts of the people.

In the last twenty years, there has been an insidious change in our concept of government. We have turned to it to perform tasks which always before were the duty of the individual and the local community. More and more of us look to government to protect us in every way. We are losing our independence. We ask government to protect our health, build our homes, care for us if we are unemployed, and see us through all the way from the cradle to the grave. We ask it to provide more and more goods and services. The polite term for this "gimme" habit is "the welfare state," a softer name for socialism. The welfare state always leads to one of two conclusions. It impoverishes and enslaves the people and subjects them to ruthless dictatorship, as in Eastern Europe. Or, finally, the people rid themselves of its worst manifestations, as the voters of New Zealand and Australia recently did. But, even in the latter case, the wealth of nations has been dissipated, and the tentacles of government have been woven so tight that it may take generations to recover.

Therefore, taxation directly affects all our liberties. Excessively expensive government is always super-government. It is paternalistic government. It is, in its more advanced stages government by fiat and decree. It is, in its final stages, government by terror. The Russian revolution was fought in the name of the common man. And now, in that huge "people's state," tens of millions of common men and women live miserably in medieval darkness, and real liberty is unknown.

The basic troubles of the world, from war to human want, can in one way or another be charged to too much government. All-powerful government is simply a reflection of the loss of individual self-reliance, initiative, pride, independence of spirit, the will to work—the qualities which made possible the founding and the growth of this republic. We, as a people, are fortunate that we have not yet gone so far on the "welfare state" road that we cannot turn back. We can still save ourselves from the final disaster that has overcome so much of the world. But we, as a people, must do it ourselves. Big government will not do it for us. We must ask ourselves this question: "Are we willing in return for a mirage of material security, for which we pay through exorbitant taxation, to sacrifice those liberties for which men have fought and struggled for two thousand years?"

Mrs. Arthur Bloss spent several days the past week with Mr. and Mrs. Harold McSweeney at Delavan.

Mr. and Mrs. Alfred Schmidt and family spent New Year's Eve with Mr. and Mrs. Paul Vigansky, of Kenosha.

Mr. and Mrs. Alfred Schmidt and family spent Thursday evening with Mr. and Mrs. Mulsh and family of Lyons.

Mr. and Mrs. Clarence Emrie and children, of Burlington, spent Monday evening with Mr. and Mrs. Robert Emrie.

Rev. and Mrs. D. Hult, of Pennsylvania, who have been visiting their son, Rev. D. Hult, Jr., left Thursday for California for a few weeks vacation.

### HICKORY

Remember the chicken dinner at Millburn church at noon Saturday, Jan. 7, and the annual business meeting of the Millburn Mutual Insurance Company.

Mr. and Mrs. Fred Leable were New Year's Day dinner guests at the Bob Alverson home on Green Bay Road, Kenosha. Mr. and Mrs. Alverson and two children have just returned from an auto vacation trip to Florida and the southern states.

Mr. and Mrs. Bert Edwards and Doris spent New Year's Day at the home of Mr. and Mrs. Norman Edwards in Waukegan.

Mr. and Mrs. Wm. Strahan, Rt. 173, were Sunday evening callers at the Earl Crawford home.

Mr. and Mrs. Wm. D. Thompson and Helen were dinner guests at the Bill Gerber home in Antioch Friday evening.

Spencer Wells and sons, Harold and Glenn, from Wilmet, spent New Year's Day at the Gordon Wells home.

Mr. and Mrs. Roy Heydecker, of Waukegan, were Friday evening callers at the Earl Crawford home. Miss Theresa Schmidt and Miss Mary Zello, special Polio nurses from St. Therese's hospital were New Year's Day guests of Warren Wells at his home.

Mr. and Mrs. Joe Sidenbecker, from Chicago, were Christmas Day dinner guests at the David Bennett home.

### Enameled Utensils

Enameled utensils save dishwashing time because their sanitary glass coatings require only a brief soaking period and a soap and water washing. They may be rinsed with hot water and allowed to drain dry.

### Pitcairn Island

Pitcairn Island was discovered in 1767, by Captain Phillip Carteret of the British sloop "Swallow." Carteret was struck with the island's possibilities for colonization purposes and named it Pitcairn after the midshipman who first sighted it.

### Agricultural Students

Although the number of agricultural students enrolled in the nation's state land grant colleges decreased slightly this year, the University of New Hampshire boasts a 23 per cent rise in enrollment over 1948.

## LEGAL NOTICE

CERTIFIED COPY OF  
RESOLUTIONS OF THE BOARD  
OF DIRECTORS OF FIRST NA-  
TIONAL BANK ANTIOCH, ILLI-  
NOIS

At a meeting of the Board of Directors of the First National Bank held on Oct. 18, 1949, the following resolutions were adopted:

WHEREAS by Section 17 of An Act to revise the law in relation to promissory notes, bonds, due bills and other instruments in writing approved March 18, 1874, as recently amended, it is provided in part that any bank doing business within the State of Illinois may select any one day of the week to remain closed and that any act authorized, required or permitted to be performed at or by or with respect to such bank on a day which it has selected to remain closed under the provisions of said Act may be performed on the next succeeding business day;

NOW THEREFORE, BE IT RESOLVED that pursuant to all the provisions of the aforesaid Act this Bank hereby selects and designates the third day of the week, commonly called Wednesday as the day of the week to remain closed, commencing with Wednesday the 7th day of December, 1949.

BE IT FURTHER RESOLVED that the Cashier of this Bank, the officer having charge of the records of this Bank, shall be and he is hereby directed to certify a copy of these resolutions, to file the same with the Recorder of Deeds of Lake County and to publish the same at least once each week for three successive weeks in a newspaper of general circulation in such county, all prior to the date of such first closing.

I, the Cashier of the First National Bank, Antioch, Illinois, do hereby certify that the foregoing is a true copy of resolutions adopted by the Board of Directors of the said Bank at a duly constituted meeting of the said Board held on the 18 day of Oct., 1949, and entered upon the regular record book of said Bank.

E. J. Sletten  
Cashier

(Corporate Seal)  
STATE OF ILLINOIS ) ss.  
COUNTY OF LAKE )

On this 1st day of Nov. 1949 before me, a Notary Public in and for said County and State, personally appeared E. J. Sletten, known to me to be the person who executed the foregoing certificate, and acknowledged to me that he executed the same; and being by me duly sworn did depose and say that he is the Cashier of the First National Bank, Antioch, Illinois, that as such officer he has charge of the records and seal of said Bank; and that the foregoing certificate is true to his own knowledge.

Doris Hills,  
Notary Public  
(22-24c)

## Wettest Spot

The world's wettest spot is along the Assam hills in northeast India. There, observes the National Geographic society, the rain-carrying monsoons, or winds from the west and southwest meet those blowing northward over the Bay of Bengal. Together they release a deluging rainfall that amounts to 50 or 60 feet a year, compared with a higher-than-average rate in the United States of only 50 inches.

## Poultry Water

The egg is composed of about two-thirds water, so the hen must consume large amounts of water to maintain high egg production.

DRIVER'S LICENSE  
\$11,000!

Fantastic price? Not at all. You might have to pay it! If you have an accident in one of the 40 states with new, strict financial responsibility laws, you might be required to post this sum in cash or security. Failure to do so could cost you your driver's license. Why not let State Farm Mutual give you the best proof of such responsibility—FULL COVERAGE auto insurance? Our lower rates make it an extra-sound investment. Call or come in today.

## Tuberculosis in Monkeys

Tuberculosis is responsible for about 80 per cent of all deaths of monkeys in captivity, a veterinary medical publication reports. The heavy loss is traced to the fact that monkeys have practically no resistance to this disease. X-ray diagnosis, commonly used by physicians to detect human cases, is said to be impractical in monkeys. Instead, veterinarians diagnose it by means of a test performed on the upper eyelid.

## Taste Tempting Decisions!

Pity the homemaker who must "face the problem" when buying apples of choosing between luscious, vivid red Jonathans, McIntosh or Delicious, extra juicy Winesaps, spicy, tangy Grimes Golden or Golden Delicious Carmine-striped Rome Beauties, or bright red Northern Spys. All are good.

## Home Sewing

Home sewing definitely is far from a seasonal activity now, if official pattern sales can be a criterion. Pattern companies report a fairly balanced distribution throughout the year. During 1948 the records show that January was the weakest month, but still only five percent away from the volumes of the top months. The top months were no more than three per cent more than other months with the exception of January.

## Pygmy Country

Joint sovereigns of Andorra, pygmy country in the Pyrenees, are the president of France and the Spanish bishop of Urgel, but its people elect their own parliament every four years. A devoutly religious community, it has grown wealthy by smuggling and black-market trading.

## Women and Inventions

Although the greatest number of inventions by women are concerned with the home, recreation and beauty, women have branched out into fields once occupied solely by men. For example, a woman is the inventor of a device to lessen the noise of elevated trains and an appliance to consume smoke and odor from locomotives and factories.

## Weak Calves

Calves born weak may be materially helped during the first few days of their life by the administration of blood transfusions from the cow and by feeding the colostrum milk, using force if the weak calf will not take it alone. The continued feeding of any surplus milk from other cows will aid materially in providing nutrients to the weak animal.

## Pipe Manufacturer

Richard D. Wood, with his brother David, built America's first foundry designed exclusively for cast iron pipe manufacture in 1825, when some of New York City's water mains were made of hollowed out tree trunks.

## Rat Prevention

To prevent rats, fire and rain from destroying small amounts of stored grain, try storing it in galvanized steel ash or garbage cans. These rust-resistant containers are equipped with close-fitting covers to thwart such menaces.

No wonder they're calling them  
"TOP CHOICE FOR 'FIFTY"

They're greater in power—higher in compression—  
a standout in styling—dreams to drive—and now there's  
a Buick beauty for 1950 to fit practically any budget

No, we just couldn't hold back the whole big Buick line for 1950.

They're too good-looking—too much fun to drive—too jam-packed with stepped-up, higher-compression, ready-to-ramble power—to be kept under cover.

So maybe you've already seen some 1950 Buicks on the highway.

Maybe you've noticed the extra "git up and travel" they have—glimped the wide, curving windshields (one piece in most models)—noted, approvingly, that the typical Buick taper is now found in all Buick fenders.

LOTS OF LUGGAGE SPACE, plus a high-fashion rear-end treatment, graces the Buick four-door Sedan models for 1950. This is the ROADMASTER, and above is the SUPER version of this much-wanted 4-door, 6-passenger Sedan.

When better automobiles are built BUICK still build them

Maybe you've even heard some things...

That there are more than a dozen-and-a-half models to choose from. That there are three power plants in the Buick line—all of higher compression, all stepped up in power.

That all models are big and roomy inside—some rear seats are better than a foot wider than before!—yet in every instance, shorter over-all, so easier to handle, park and garage.

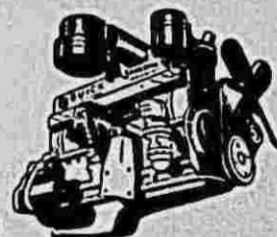

Above all, maybe you've heard of exciting news on price...

That Dynaflo Drive, for instance—standard on ROADMASTER models, optional on all others—now costs 20% less than on 1949 models.

POWER NEWS WITH A  
REAL PUNCH!

Here's just one part of Buick's three-way power story for 1950—the brand-new F-263 valve-in-head straight-eight. Packing a wallop that makes the SUPER a standout performer of the season, here is still higher compression and still greater power in no greater over-all size. You'll get this new engine on all SUPER models, in 124 hp with Synchro-Mesh transmission, 128 hp with Dynaflo Drive.\*

\*Standard on ROADMASTER, optional at extra cost on SUPER and SPECIAL models.

That in the full line—SPECIAL, SUPER and ROADMASTER series—there is a Buick to fit practically every budget above the very lowest!

Pictured above is the 1950 SUPER 4-door Sedan, one of the new Buick body types for 1950. At your Buick dealer's are more actual models, the whole story on others.

Hadn't you better see him—right now—and see if you, too, don't find Buick "top choice for 1950"?

WHATEVER YOUR PRICE RANGE  
"Better buy Buick"

Tune in HENRY J. TAYLOR, ABC Network, every Monday evening.

# Canary

## Bird Turns Stool Pigeon

DETROIT. — A kidnaped canary turned stool pigeon and landed his somewhat dubious owner in police court.

When a woman store detective noticed Mrs. Irene Zaja punching holes in the shopping bag she was carrying, the detective confronted her.

Mrs. Zaja was denying having taken anything from the store's pet department without paying for it; when from the bag came a plaintive "cheep, cheep."

Mrs. Zaja pleaded guilty to a charge of simple larceny and received a suspended sentence for taking one of the store's prize songsters.

"My husband is away from home a lot," she said, "and I'm lonesome. I thought a canary would be a good companion."

# 1,000 Women Serve As Test Subjects For Cosmetic Shop

NEW YORK.—More than a thousand women—from teen-agers to septuagenarians, are voluntary guinea pigs for a cosmetic testing laboratory here.

The women live in a strange half-and-half beauty world of their own. If a home permanent is being tested, only half a head gets the permanent. The other half may get a rival permanent, or is left untouched as a way of making comparisons. The same is true of shampoos.

A depilatory being investigated is applied to one leg. The other remains untouched as a control. In a like manner, creams, makeup, deodorants, skin preparations and other cosmetics are compared. All are nationally distributed products, whose names you'd recognize instantly.

None of the women mind being guinea pigs, says S. F. Coneybear, an official of the Evans research and development corp. After all, he points out, you can't tell by looking at them. And they get valuable beauty shop treatments at the hands of skilled operators. In a given period a woman gets six to eight shampoos, a permanent wave and the finest materials administered by skilled operators.

The purpose of the laboratory, Coneybear says, is to evaluate a cosmetic long before it is placed on sale. Answers to these questions are sought: Is it safe? Is it efficient? Has it esthetic appeal?

To obtain this information hundreds of women have been offering the use of their scalps, faces, arms and legs since 1922, when the service was begun. Recruiting has been no problem at all, strange as it may seem. Word of mouth alone has provided volunteers in sufficient numbers.

# 'Dejobulated' Employee Makes Wistful Plea for Job Back

LONDON.—A British colonial office in Nigeria has reported receiving the wistful plea from a west African native who suddenly found himself out of a job with the colonial agency.

"Dear Sir: On opening this epistle you will behold the work of a dejobbed person and a very bewildered and much childrezened gentleman who was violently dejobbed in a twinkling by your good self."

"For heaven's sake, sir, consider this catastrophe as falling on your own head, and remind yourself on walking home at the moon's end to five savage wives and 16 voracious children with your pocket filled with nonexistent pounds, shillings and pence and a solitary shilling; pity my horrible state."

As to the reason given by yourself acquire for my dejobment the incrimination was laziness. No sir. It was impossible that myself who pitched 16 children into this vale of tears can have a lazy atom in his mortal frame, and a sudden departure of 11 pounds has left me on the verge of destitution and despair.

"I hope this vision of horror will enrich your dreams this night and the good angel will melt and pulverize your heart of nether millstone so that you will awaken with such alacrity to rejobulate your servant. So mote it be, Amen."

Officials here did not know whether the dejobbed west African was reassociated with his job.

# This Society Makes Good On Claims for Members

NEW YORK. — The Brooklyn Benevolent Uplift society doesn't do things by halves. Greatly irked when two of its members were accused of robbery, the society went right to work to prove their innocence in the most complete way they knew how—they nabbed the real culprits.

Two BUS members in good standing were arrested after they were tentatively identified as the pair who held up two cab drivers Saturday and robbed them of \$20 each. They protested they were innocent. So did the society.

When that didn't do any good, leaders of the society left the police station to "see what we can do." Two hours later a dozen husky members strode back into the station with two men in tow.

Police said the two prisoners were promptly identified by the cab drivers and later admitted the robberies.

# Uncle Sam Says

You are now at the half-way mark of this 20th Century. The past 49 years have witnessed momentous strides in science, medicine, engineering, in short, all phases of human endeavor. These have provided unlimited opportunities for my nephews and nieces, with openings galore for the practice of their skills and inventiveness. In addition, your government offers a simple, safe and sure method which insures future security for home and family through the purchase of U.S. Savings Bonds. By enrolling now for the Payroll Savings Plan where you work, or if self-employed, the Bond-A-Month Plan where you bank, you will receive \$4 for every \$3 in ten short years. Make the 1950's your goal for that future security.

U. S. Treasury Department

Quick Silver  
Oregon has one of the only two United States producing quicksilver mines.

# Power Source

When workmen turned out the 10th of the world's largest water-wheel generators now in operation at Grand Coulee dam, they made the project the world's greatest single power source. Its rated power capacity with 10 generators in operation is some 1,100,000 kilowatts — enough to meet the combined power needs of Washington, D. C. and Baltimore.

# Fruit En Roll

To make a wonderful dessert, roll out your favorite biscuit dough and spread it with a thick fruit sauce—rhubarb, strawberry, peach—or any of your favorite summer time fruits. Then roll it up jelly roll style and cut the roll into two-inch slices and bake. The clever dessert slices can be topped with more of the fruit sauce or with sweetened whipped cream.

# Oregon's Mountains

High mountains seem to come in families in Oregon. In the Cascade range near Bend are such high peaks as Three Sisters, Wife, Husband, Little Brother, Big Brother, Maiden, Twins and Bachelor Butte. To top it all off, House Rock is nearby. These peaks are fairly closely grouped together in the central Oregon vacationland.

# Renewing Porch Rugs

To renew grass or fibre rugs of the type frequently used on porches, coat them with regular exterior house paint, thinned to the consistency of stain with turpentine, in the proportion of one part turpentine to four parts paint. A 9 x 12 rug will require approximately three quarts of paint and one and a half pints of turpentine.

**LAKE VILLA**

Next Sunday, Jan. 8, will be Communion Sunday at the Community church, and Rev. Harrison will use the sermon topic, "All Things New." The Youth Fellowship group will meet Sunday evening at 8:45. Sunday afternoon communion will be taken to any elderly or shut-in in the vicinity. Regardless of denomination, any elderly or shut-in person may have communion served in their home by dropping a card to the pastor or by calling Lake Villa 4871.

Next week Wednesday evening the monthly pot luck supper for church family night will be served at 6:45 and you are welcome. The Church Board is in charge of the serving and entertainment. Just bring something for the supper and enjoy the evening.

T. J. Tronson, railroad operator, spent last week with relatives in northern Wisconsin, and his place here was filled by B. Schraufnazel.

Mr. and Mrs. Wm. Schneider and son, Billy, of Eau Claire, Wis., spent Christmas with her mother, Mrs. Anna Nader and other relatives.

Mr. and Mrs. Lloyd Atwell entertained a few neighbors and friends at a New Year's party at their home near Monaville last Saturday night.

Mrs. Carl Ekdahl and Carlene were Burlington visitors last Friday.

The Royal Neighbors will hold their next meeting on Tuesday afternoon, Jan. 10, at the home of Mrs. Marie Hamlin. This is an important business meeting to plan for the installation of officers later in the month.

The Millburn Chapter of O. E. S. will sponsor a benefit card party at the Millburn Masonic temple on Saturday evening, Jan. 7, at 8 p. m. and the public is invited. Mrs. A. H. Johnson is publicity chairman.

Mr. and Mrs. B. J. Hooper, their daughter, Mrs. Ed Langbein and

children visited their other daughter, Mrs. Traver Ellis and family at Belvidere last Thursday.

Mr. and Mrs. Harvey Obenauf, of Cedar Lake, are receiving congratulations on the birth of a son at Condell hospital at Libertyville on New Year's Day.

Mr. and Mrs. Howard Fish and daughters, of Algonquin, also Mr. and Mrs. Wm. Fish, of Barrington, were dinner guests of Mr. and Mrs. Jake Fish on New Year's Day.

Gene Nickerson, of U. S. Marines stationed at Camp LaJeune, N. C. is having a 15 day furlough and is with his mother, Mrs. Mary Nickerson for the time.

Mrs. Russell Nickerson returned home from the hospital last Saturday, but her young son, Terry, born Dec. 28, remained until Tuesday.

A number of village couples enjoyed a New Year's party at the fire station last Saturday night.

Mr. and Mrs. Earl Hucker and sons returned last Saturday from a pleasant trip to Florida.

Village Clerk Reinebach announces that 1950 Village of Lake Villa Vehicle tags are now available to those who want them although not due until July 1st.

# SOCIETY EVENTS

## Sportsmen's Clubs Sponsor Essay Contest With Trip To Outdoors Show as Prize

Chicago.—Boys and girls of the central states will get an opportunity to express their opinions on the over-whelming popular sport of fishing, with highly valuable prizes at stake, in an essay contest conducted in conjunction with the Chicago Outdoors show which will be presented on Chicago's Navy Pier Feb. 10 thru Feb. 19.

The subject of the essay is to be "Why Fishing is My Favorite Sport," articles being limited to 200 words.

Any boy or girl 17 years or younger residing in Illinois, Wisconsin, Indiana, Michigan, Iowa, Minnesota or Ohio is eligible to go into this competition. The two winners, a boy and a girl, will be brought to Chicago as guests of the show management. There they will receive numerous prizes which will include the finest fishing tackle on the market.

The contest is sponsored by the Illinois Federation of Sportsmen's Clubs. Judgment on the essays will be rendered by a thoroughly competent jury of experienced outdoorsmen. The compositions are to be sent to the offices of the Chicago Outdoor Show, Room 1514, Tribune Tower, Chicago 11, Illinois. The deadline for entries is Jan. 23.

## Churches Abandon Sunday School Bus Service Here

Announcement was made by both the Episcopal and Methodist churches in Antioch this week that the bus service inaugurated as an experiment a month ago will be abandoned.

The bus service was initiated to serve families in the Grass Lake and Channel Lake areas, but the response was so small that continuation of the project was not deemed worthwhile. It was decided by the ministers of both the Episcopal and Methodist churches that most young people who wanted to attend church school already had satisfactory transportation.

The Rev. Percival James Jamieson, 893 Main st., has been appointed as assistant priest at St. Ignatius' Episcopal church. The Rev. Dr. Jamieson is the father of Mrs. Robert S. Nelson of Antioch, and is a retired priest of the Mother Church of England. Dr. Jamieson was a Captain in the British Army in the First World War, and was successively a Doctor of Medicine, Headmaster of a school in England, and Vicar of several parishes in England after being ordained to the Ministry in 1932.

When installation of choir officers took place on New Year's Day at St. Timothy's Lutheran church at Menasha, Wis., Caroline Ann Wildhagen, grand-daughter of Mrs. Fred Paasch, of Channel Lake, was installed as librarian of the Youth Choir. Caroline Ann is the daughter of Mr. and Mrs. Raymond W. Wildhagen, former Antioch Township residents.

The Rev. Roberts Ehrigott announces the following appointments to the Finance Committee of St. Ignatius Episcopal church: Mr. Elmer Brook, Mr. J. E. Brook, Mr. William Brook (as assistant treasurer), Mr. and Mrs. Fred Hawkins, Mrs. John Horan, Sr. (as treasurer), Mr. John Horan, Jr., Mr. Ralph C. Jepsen (as senior warden of property), Mr. Henry Kapell (as junior warden of property), Mrs. Ida Osmond, Mr. Loren D. Sexauer (as president), Mr. Donald Stowe, Mrs. L. R. Van Patten, Sr., (as clerk). The members will be instituted at the altar immediately before their first meeting on Friday, Jan. 6, at 8 p. m.

## M. Y. F. TO HAVE INDOOR RECREATION

There will be indoor recreation at 4:30 p. m. Sunday for the M. Y. F., followed by discussion and worship services under the direction of Sylvia Beelow, Doris Petersen and Marlene Wertz.

## PARENTS OF SON

Mr. and Mrs. Melvin Wohlfeil are the parents of a son "John Berke", born at St. Therese hospital, Waukegan, December 22. The boy weighed eleven pounds and four ounces. Mrs. Wohlfeil before her marriage was Miss Josephine Roche, the daughter of Mr. and Mrs. Lawrence Roche of Petite Lake.

## Lake Geneva Man Ill Here

The Rescue squad was called to the intersection of Rtes. 173 and 59 Tuesday afternoon to give first aid to a Lake Geneva resident who had fainted while in his automobile, but who had recovered by the time they arrived. A companion drove the car in taking him home.

## Theatre Party for Faculty

The teaching staff of the Antioch Township High school will go to Chicago this evening to see the play "Kiss Me Kate." They will have dinner in Chicago before going to the theatre.

### CARD OF THANKS

Our most sincere thanks to all for the various acts of kindness and the many beautiful floral pieces and other gifts received at the death of our beloved husband and father, Fred Peterson.

Hilda Peterson and family

### CARD OF THANKS

I want to express my deepest gratitude to the students of my husband, my friends and neighbors for their many expressions of sympathy shown me in my bereavement.

Mrs. Karl F. Wiechmann

### Boys Hurt in Car Accident

Ronald Meyer, 16, and Marvin Holtdorf, 18, both of Antioch were cut and bruised when the car Holtdorf was driving collided with a car driven by James H. White, 29, Salem on Highway 50 near Kenosha Monday. White also was cut and bruised.

## V. F. W. Plans Annual Dance For Feb. 10th

The local post of the V. F. W. is currently working on plans for the annual dance and party which commemorates the Sinking of the Maine. The dance this year will be held at Norsore Gardens on North Ave., at Lake Catherine.

Lewis Adams will serve as chairman of the affair, and the music for the dancing will be furnished by King Jaros orchestra. Richard Burnette, commander of the post, said that every effort would be made to make the party the outstanding event of the year.

## Two Adult Courses Start At Antioch High School Will Continue 10 Weeks

A 10-week course in agriculture for men and a course of similar length in home making for women were started at the Antioch Township High school last evening.

The course under the direction of August L. Wickert of the agriculture department is entitled "Soil Fertility," and Ray Nicholas, farm adviser, was the first speaker.

The home making course is directed by Miss Naomi Miners of the home economics department of the high school.

The last session will be preceded by a dinner in which adults of both classes will participate. In most instances the classes are a husband and wife combination, the husband seeking information in agriculture and the wife in home making with the classes running simultaneously. There is no tuition cost, the expense being borne by the board of education through federal aid.

## Farm Record Book Meeting Planned for Jan. 13

A farm record book meeting has been planned by Farm Adviser Ray T. Nicholas for Friday, January 13, starting at 1:15 p. m.

Mr. Geo. B. Whitman, Specialist in Agricultural Economics, will conduct the meeting. He will assist the 1949 record book keepers in completing their record book, and tell others starting for the first time how to use the Illinois Farm Record Book.

The meeting will be held at the Farm Bureau office in Grayslake, and all interested farmers and their wives are invited to attend. The record books may be obtained at the Farm adviser's office in Grayslake.

## Legion Asks Children To Leave Toys at Ford Garage by Saturday, Jan. 7

The Antioch Ford garage has been designated as the place where toys may be left in the American Legion's collection of "Tide of Toys" for the children of Europe. Saturday, January 7, is the last day on which they may be given.

Mrs. W. A. Biron, child welfare chairman of Antioch Unit 748 American Legion auxiliary, is assisting the post in the drive.

She said the toys are not to be wrapped, but that the name of the child or older person giving the toy with a word of greeting should be attached to each article.

Toys should be in good condition of sturdy construction, not warlike electrical or fragile.

## LAKE VILLA MERCHANTS TO PLAY SILVER LAKE

The Lake Villa Merchants basketball team will resume action on Jan. 11, playing the Silver Lake team at the Lake Villa Grade school gymnasium. The first of two games will start at 7:30 and the second as soon as the first is completed. Silver Lake defeated the Cedar Lake team recently and therefore is no stranger in Lake Villa.

## 1950 Coin Collector

Yes, it looks like a very small iron lung. You can help make it powerful beyond its size. Your dimes and dollars filling this miniature iron lung will help empty real ones in hospitals across the country. Join the March of Dimes, January 18-31.

## Ted's Sweet Shop Yields \$21.50 to Burglar Who Forces Door at Night

While Ted Poulos was absent from his Sweet shop on Lake st., for two hours Tuesday night, a burglar broke in and stole \$15 in cash and a negotiable check for \$6.50.

Entrance to the store was made by forcing a rear door. Poulos left the place at 10 o'clock and returned two hours later after a visit with friends and found the front door of the shop barred with a chair.

He forced his way inside and found that the thief or thieves had cleared his cash register and a cigar box which contained bus fare money of \$15, and the check. No merchandise was taken.

Ted's shop serves as a bus station for the Cardinal line.

## Capital Goods

Outlays for capital goods are a smaller proportion of gross national product in depression than in prosperity. In 1925-1926 they formed 19 per cent and in 1933 less than 8.5 per cent of gross national product.

## Bahama's Wild Pigs

The wild pigs found on some Bahama Islands are not strictly land-based animals, like the domesticated swine in the United States. They often go to sea as well. They swim from island to island in search of food or to escape the dogs of hunters or natives, says the National Geographic society.

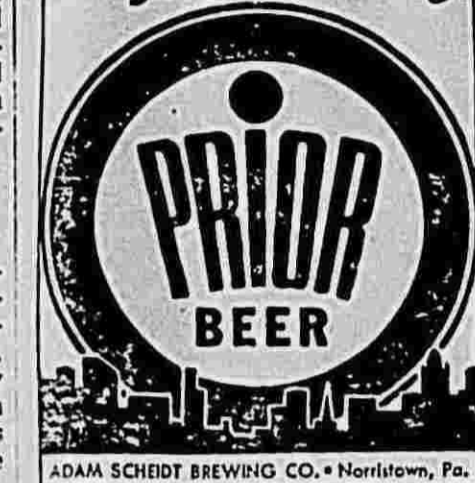

## Origin of "Vanilla"

The word vanilla is from the Spanish, and means "little pod." In each of the now widely scattered species of the vanilla plant, the little pod is preceded by a dainty yellow bloom which leaves no doubt that the plant belongs to the orchid family.

## Fine 'n' Fast

A quick meal to serve your family! Simply cut chilled canned corned beef hash in cubes, roll in flour and brown them in hot lard or drippings. Add quartered hard-boiled eggs and canned mushroom soup. Heat the mixture completely, then serve it over hot buttered toast.

## The One Beer in America that is Different Liquid Luxury

## Vital Statistics

Death rate per 1,000 persons fell from 17 in 1900 to less than 11 in 1945. In same period, life expectancy raised from an average of 49 years in 1900 to an average of 68 in 1945.

## Diamonds

The public generally believes that all diamonds are white. However, diamonds are sometimes green, red, pink, brown, and even black.

# When Sick Call 6 - We Deliver

### WOMEN'S HANDICAP LEAGUE I. Cook, Secy.

Seyfarth's was high scoring team last Tuesday at the Antioch Recreation when the Ladies Handicap League met. Their total score was 2258. Marge Anderson was high individual scorer with games of 150, 205, 165 for a 529 total. Darlene Bauer had a 507 total, and L. Fernandez hit one game of 206.

Four teams made clean sweeps, winning three games. This week's competition saw Regal China blanking the Antioch News, Seyfarth's beating Mehrings, The Country club winning over the Art Corner, and Ehrhardt's over Linders.

The other two contests ended two to one with Bud's over Salem and Pagel's over Smith's.

### MEN'S MAJOR LEAGUE (FRI.) Roman B. Vos, Secy.

First high team, Antioch Builders 2687; Second high team Bussie's 2583. First high team single game, Antioch Builders 939, Second Volo Bait Shop 909.

High individual three games, st Roy Wesliu 606, second Al Fischer 589. High single game, 1st Roy Wesliu 247; second Ed Kania 217.

Antioch Builders won two from Bussie's. Linders took two from Snow White and Volo Bait Shop took two from Antioch Lumber and Coal Co.

### THURS. NIGHT BUSINESSMENS J. J. Smith, Secy.

High team for the night Johnson's Resort, 769, 986, 878-2633. High individual scorer E. Petersen, 237, 179, 181-597. Second high individual scorer H. Linder 563. High individual game E. Petersen 237. Second high individual game, R. Wells 224. Seyfarth's Resort won all three games from Keulman's.

Salem Business men won all three from Millburn.

Johnson's won the odd one from Herron's.

Stanley's won two out of the three over Regal.

Lions club won two of the three from the Servicenter.

The Milling Co. took two of the three from Carey Electric.

### LADIES MAJOR LEAGUE Dorothy Ferris, Secy.

High team for the night, Johnson's 712, 744, 821-2277. High individual scorer E. Courtney, 202, 187, 167-556. Second high individual scorer R. Seyfarth 508. High individual game E. Courtney 202. Second high individual game L. Bernhagen 201.

Blums won all three games from Barnstable and Brogan. L. Fernandez 154, 179, 160-493 for Blums. M. Walsh 157, 159, 155-471 for B. and B.

Johnson's took two games out of three from Bussie's. R. Seyfarth 158, 180, 170-508 for Johnson's. H. Seigelke 128, 151, 188-467 for Bussie's.

Antioch Recreation won two of the three games from Reeves. A. Rogers 177, 142, 158-477 for Antioch Recreation. E. Courtney 202, 187, 167-556 for Reeves.

### MON. EVE. TAVERN LEAGUE Len Fischer, Secy.

High team for the night Thor's Club Villa, 842, 951, 1006-2799. High individual scorer T. Thorness 202, 247, 182-631. Second high individual scorer W. Soldmann 615. High individual game T. Thorness 247. Second high individual game C. Anderson 232.

Pagel's won all three games from Thompson's. C. Anderson 551 for Pagel's. A. Rosenfeldt 497 for Thompson's.

Ehrhardt's won all three games from Antioch Recreation. L. Fischer 520 for Ehrhardt's. G. Keulman 485 for the Recreation.

Halings took games from Lou and Ed's. R. Strametz 564 for Halings. O. Hunt 230 game 533 series for Lou and Ed's.

Pikeville won two games from Sorenson's. G. Fox 540 for Pikeville. E. Sorenson 534 for Sorenson's.

Bud's took two games from Hans and Mabel's. J. Fernandez 504 for Bud's. A. Johnson 556 for Hans and Mabel's.

Thor's Club Villa took two games from Kempf's. T. Thorness 631 for Thor's Club Villa. W. Soldmann 615 for Kempf's.

#### STANDINGS

	Won	Lost
Halings	35	16
Bud's	29	22
Ehrhardt's	28	23
Sorenson's	27	24
Antioch Recreation	26	25
Pagel's	26	25
Hans and Mabel's	25	26
Kempf's	25	26
Club Villa	24	27
Lou and Ed's	23	28
Pikeville	21	30
Thompson's	18	33

#### Painting Doors

When painting a door, coat the panels first, then the center rail, the top and bottom rail, the vertical stiles and finally the edges. This procedure will avoid streaks and runs. Be sure to paint the top and bottom edges of all doors to keep out moisture and prevent rotting and warping.

### 'ASSUMPTIVE WORLD'

## Perception Keys Action

PRINCETON, N. J.—An experiment in an "Alice-in-Wonderland" type of laboratory at the Hanover Institute, Hanover, N. H., has produced new studies in the process of perception which scientists regard as a basic key to human behavior.

In the strange rooms of the laboratory oblong rooms appear square, far objects seem near, stationary objects move and short and tall individuals are transformed by mirrors into giants and dwarfs. The experiments were demonstrated by Prof. Merle Lawrence, of Princeton's department of psychology. The apparatus was designed by Prof. Adelbert Ames of Hanover.

"The experiments show," Professor Lawrence said, "that what you see when you look at something depends not so much on what is there as on the assumptions you make when you look."

"Assumptive" World  
What we believe to be the "real, physical world," is only an "assumptive," or "form" world.

"In other words," Professor Lawrence explained, "a person builds up out of past experience a conception of reality which enables him to guess the results of his actions in the real world. But when the same person is confronted with the distorted rooms and deceptive distances in the laboratory, his assumed world falls him and his actions do not get the expected results. He sees a room that seems to be rectangular, for example, but the only reason it looks rectangular is because he has had much experience with rectangular rooms."

Actually, he said, there are an infinite number of differently shaped rooms, all of which will look rectangular when viewed from the proper position. That is, they will look rectangular to the person who has lived all his life in rectangular rooms.

#### Peepholes Used

One of the demonstrations included the viewing through a peephole of two normally sized men placed in one of the peculiarly distorted rooms developed in the Princeton and Hanover laboratories. One in one corner of the room looked like a dwarf, while the one in the other corner looked like a giant. When they changed positions, the giant became the dwarf and vice versa. When the true lopsided nature of the room was revealed the illusion vanished.

"The effect," Professor Lawrence explained, "was the result of the assumption on the part of the observers that the room was rectangular."

"These new psychological studies have meaning both in practical affairs and psychological theory, and it appears likely that a new method of psychological analysis may develop from these experiments. By watching a patient's reaction to the tests, the psychologist may be able to tell what conception of the world that patient has formed from his past experience, and this would indicate a method of treatment."

### Terms Meteor, Meteorite Confused in Public Mind

LOS ANGELES.—Too many persons confuse the term "meteor" and "meteorite," according to Dr. Frederick C. Leonard, a professor of astronomy.

A meteor, he emphasizes, is the luminosity that results when a meteorite collides with the earth's atmosphere, a phenomenon commonly referred to as a falling or shooting star. The meteorite, however, is the solid body of subplanetary mass that is falling or has fallen from space.

Earthly meteorites are the only astronomical bodies about whose origin anything is known certainly, according to Dr. Leonard.

Those meteorites that hit the earth are probably the remains of some ancient planet or planets. The meteorites that are consumed in flight to the earth's atmosphere are apparently portions of comets that have been strewn along their paths and have come close enough to the earth to be drawn into its atmosphere.

### Escaped Wild Apes Nabbed With Orange Slice Bait

DALLAS, TEX.—Two wild, wedded young apes finally swapped their freedom for a mess of sliced oranges.

A pair of Indian gibbons escaped on the north edge of the city as they were being delivered to a veterinarian to be vaccinated against sleeping sickness.

The vet put a small cage in the crotch of a tree the gibbons were beginning to call home. With a 30-foot cord he could slam the cage shut from the ground. Inside the cage were bananas, peanuts and other bait—but never any gibbons when the door banged shut.

The vet noticed the only time the gibbons had a row was over a long orange slice he left in the cage. He filled the cage with orange slices and got a longer cord. The gibbons raced for the cage, bang! went the door—and the vet had them.

### Thunderstorm 'Batteries' Charge Earth's Energies

LOS ANGELES.—A giant electrical system, with the sun as a generator, thunderstorms as batteries and the earth and the ionosphere as a condenser was pictured in a recent seminar on the Los Angeles campus of the University of California by Dr. Robert E. Holzer, professor of geophysics.

On the average of 1,800 "thunderstorm batteries" are busy at all times maintaining the negative charge of the "earth-ionosphere condenser," he said.

The concept of thunderstorms maintaining the earth's negative charge is not entirely new, Dr. Holzer pointed out. Nobel prize-winner C. T. R. Wilson suggested it several years ago. Current investigations tend to bear out that hypothesis.

The greatest number of thunderstorms occur when it is afternoon over such land areas as South America and Africa. Measurements of the earth's charge indicate that it is at the maximum during this period.

Further investigation in this field may prove highly significant to weather forecasting, Dr. Holzer said.

### Rubber Mask Fad Attracts Attention Of Mental Probers

NEW YORK.—The wearing of rubber masks by otherwise normal people—a practice that apparently is spreading rapidly in the bigger cities—has engaged the attention of the psychiatrists.

Why are the masks going like "hot cakes"? Why are so many ordinary people buying false faces to make them look like witches, pirates, glamour girls and boys?

According to the mental probers, folks who wear the masks are just "little guys who don't think much of themselves and are trying to show a brave, bold face to the world."

The psychiatrists put it into long words, but that's the gist of their diagnosis.

According to a clerk in a drugstore at 51st and Sixth avenue, the store sells on an average of 100 masks a day—to businessmen, well-dressed women, "all sorts of people."

For \$1, it appears, you can transform yourself instantly into a pirate, a witch, a glamour puss, the devil or 10 other assorted personalities.

You'll look real enough to scare yourself, too. The masks are thin, face-fitting, and realistic down to the last wen and wrinkle.

Most of those on the market are turned out by designer Keith Ward and manufacturer Fred Hagemann. Production started last May and they can't keep up with orders. Chain stores are selling masks all over the country.

Enter now the psychiatrist, Dr. J. L. Moreno.

How, doctor, do you account for this mass masquerading?

"Many people," he says, "are dissatisfied with themselves, with their personalities."

"Wearing a mask does two things for them. First, it hides their faces. It enables them to become anonymous. Second, it enables them to play at being someone else—someone more glamorous, perhaps. "I am not surprised that many persons have taken to wearing masks. It was a perfectly natural development, once the masks became available. A relatively harmless development," I should say. Much better than becoming a blind, anonymous follower of some Hitler."

### Mayan Woman Bought Items Of Pottery During Revolt

LOS ANGELES.—The Mayan woman may have undergone periodic revolts against the status quo just as the modern housewife does, says Dr. G. W. Brainerd, University of California at Los Angeles anthropologist and authority on Mayan civilization.

What did she do about it? She couldn't switch her living room furniture around, because she didn't have enough to bother with. She didn't go out and buy a new hat, because the Mayas didn't wear hats.

Dr. Brainerd says she may have acquired a new set of pottery. A constant change in pottery-and-jug fashions, he points out, was a very fortunate thing for archaeologists and anthropologists today.

Pottery has been one of the main sources of the analysis of the cultural history of these ancient people. Without it we may have known much less about them than we know now, the U.C.L.A. anthropologist emphasizes.

Dr. Brainerd and Dr. W. S. Robinson have worked out a statistical analysis technique of variations in patterns of buried ceramics. This new technique has made possible greater accuracy in determining the chronology of deposits in important Mayan sites.

The Mayas, Dr. Brainerd points out, didn't change their pottery design as regularly as women change fashions today. But the change was often enough to be of decided assistance in accurately determining the age of various ruins with the use of the statistical analysis method.

## Your Income Tax

by John T. Jarecki, Collector of Internal Revenue for the First District of Illinois

#### Article No. 1

This is the first of a series of articles by John T. Jarecki, Collector of Internal Revenue for the First Collection District of Illinois, summarizing the most important facts pertaining to your Federal income tax return reporting your 1949 income. This article explains who must file a Federal income tax return, why and when it must be filed, and how it should be paid.

#### Filing Requirements

A citizen or resident of the U. S., whether single or married, having a gross income of \$600.00 or more for 1949 must file a Federal income tax return.

Although most of your Federal tax is withheld from your wages each payday or paid on your Declaration of Estimated Tax each quarter, the law requires you to file an annual return to determine whether you owe more tax or should get a refund of your overpayment.

If your earnings were less than \$600.00 in 1949 you should file a return, because you may be entitled to a refund. No refund will be made unless a return is filed.

Try to avoid the last minute rush by filing as soon as possible. Returns for the calendar year 1949 must be filed between January 1 and March 15, 1950.

All returns should be filed at the office of the Collector of Internal Revenue in your district. Do not mail your return to Washington.

Any balance of tax shown to be due on your return, Form 1040, (the white form) must be paid in full with your return. You may pay in cash, or by check or money order. Checks or money orders should be made payable to "Collector of Internal Revenue."

Do not send currency by mail and do not send one check to cover payments on several different returns.

Be sure your return is properly signed. If it is a joint return be sure both husband and wife have signed.

Blank returns have been mailed to each taxpayer. But if you need additional forms you can get them at the office of any U. S. Collector of Internal Revenue.

Please do not forget that you must attach to your tax return every form W-2 that you received from your employers for 1949 salaries or wages. To prevent the loss of these forms you should pin or staple them to your return. File early if you expect a refund.

The next article will list the branch offices in the First Collection District of Illinois at which both forms and assistance in filing can be obtained.

#### Job Qualification

Ability to pilot an airplane is becoming an important qualification when applying for a job in many industries today.

### Call County-Wide Meeting To Start Legume- Grass Program

All farmers in Lake County will have an opportunity to find ways and means of increasing their farm profits when they attend a special county-wide legume-grass meeting Tuesday, January 10.

Farm Advisor Ray T. Nicholas this week urged all farmers and their wives in the county to attend the meeting, which marks the start of a series of activities designed to increase the acreage of legumes and grasses on Lake County farms. The meeting will be held in the Farm Bureau Hall starting at 1:15 p. m.

"There is growing interest in the plans that have been made for Lake County's participation in this program," Nicholas said, "and the complete details will be reported at this first meeting."

Present estimates indicate that Lake County should have at least 10,000 more acres in legumes and grass. This much is needed to build back the fertility of our soils, increase the organic matter and improve the efficiency of our livestock feeding operations.

One of the features of the meeting will be the showing of the sound-color film, "Green Dollars." The movie was produced by the University of Illinois College of Agriculture, and all the scenes were taken on Illinois farms or on the experiment station fields of the college. It stresses the need for a balanced legume-grass program on every farm and shows how much a program can be established.

The prospect for increased acreage restrictions on corn, wheat and soybeans, more and more farmers will want to turn more acres into profitable legume-grass production, Nicholas said. Years of research at the Illinois College of Agriculture show that legume-grass pasture and hay are among the most profitable crops for livestock on the farm. At the same time, an increase in legume-grass acreage is needed to keep the soil in a high state of productivity.

The program in Lake County is part of a state-wide effort to focus attention on the value of legumes and grass for soil building, erosion control and livestock feeding. This state-wide drive is under the general direction and supervision of the Illinois College of Agriculture at Urbana.

#### Washington's Home Town

Alexandria, Va., was George Washington's home town on the Potomac. Its present day population is about 72,000. Sale of the town's first lot was made at public auction, July 13, 1749, 200 years ago.

#### Tailor-Made Finishes

Special coatings for refrigerators have been devised by the scientists of the paint and finish industry. Such coatings must give protection against high humidity, low temperatures and the corrosive effects of food acids.

### All Landlords Obligated To Keep up Property to Get Legal Rent Increase

A landlord who gets a legal rent increase has a special obligation to keep up his property and provide the services included in the ceiling rent, J. Edwin Porter, associate rent director said today.

His reminder was prompted by some tenants' reports that their landlords have cut out services or failed to make needed repairs after rents were increased.

"These landlords are violating an important requirement which Congress attached to all adjustments under the 1949 law," the rent official explained.

"Every landlord who submits a petition to the rent office for increase of rent also certifies that he has been maintaining all services required by the rent regulations and will continue to furnish them if his petition for an increase in rent is granted. And, in fairness to the tenant who pays a higher rent, we insist that landlords live up to their agreement."

Porter explained that his office attempts to get the services restored before taking other action. If the landlord refuses to fulfill his agreement to maintain services, then the rent office can reduce the maximum rent and seek a refund of overcharges.

"We look on these violations as a misunderstanding and most landlords get in line as soon as we explain the situation," he added.

#### Rare Globes

Yale university has bought two of America's earliest globular maps turned out by a self-taught Vermont blacksmith more than 100 years ago. James Wilson made the globes in his Bradford, Vt. blacksmith shop after studying geography and astronomy in an encyclopedia.

#### Mount Vernon

Mount Vernon, priceless and beloved heritage of the American people, might well be a shambles today if it were not for the careful maintenance and frequent painting it receives at the hands of its faithful guardian, the Mount Vernon Ladies' association.

#### Garlic Bread

To make garlic bread for serving with special salads or casseroles, cut a loaf of French or Vienna bread into thick slices, but do not cut entirely through into the bottom crust. Mash a clove of garlic into three or four tablespoons of margarine. Spread this between the slices of bread and pop the loaf into the oven until hot and crisp.

#### Animals Losing Out

In 1946 Texas ranked first in the number of horses and mules on farms and third in the number of mules on farms. Today about 65 per cent of Texas' farms do not have a team on the place, and only about 200,000 horses were used in crop production in 1948.

## SHORT STORY

## Thanksgiving Turkey

By Richard Hill Wilkinson

IMOGENE sat at the kitchen table and listened starry-eyed while Tony read the letter. "Dear Tony and Imogene: I was sorry to hear about Tony's ill luck down there in Carolina, and know you must be having rather a hard pull. But things are bound to straighten out. Under separate cover I am sending you a turkey for your Thanksgiving dinner. Please don't acknowledge its receipt, as your Aunt Sara might read the letter. She doesn't know I'm doing this, and I doubt if she'd approve—you know how she felt when you two got married and started out on your wild venture. My love to you both. Uncle Rufus." Tony pulled off the last wrapper and grinned happily. Within the cardboard box there nestled a handsome, fat turkey; a delicious, palatable turkey. Tony's mouth watered at sight of it.

Accompanying the bird were vegetables galore, nuts and fruit and a real plum pudding ready for heating. It was complete, old-fashioned Thanksgiving dinner.

At length Imogene stirred. She turned and looked through the window and there was something queer about the expression on her face. Tony saw the look and he came and sat down on the table and took her hand in his.

Imogene looked at him squarely. "I was thinking, Tony, about the Santrells. I can't help it, with this big turkey here in front of us."

Tony's hand tightened its grip. "Precious," he said gently, "you're a dear."

He was silent, then, staring thoughtfully out into the yard. The Santrells, he reflected, had probably never had a turkey for Thanksgiving. It was doubtful this Thanksgiving if they'd have anything to eat. They were poor, dirt poor, and there were eight children in the family. Mr. Santrell was sick half the time; he couldn't work, even if work were available. Their plight was pitiful. They had been too proud to ask for help; had reached a state of near destitution, when the town discovered their condition.

PRESENTLY TONY turned. He said: "Listen, sweet, as far as I'm concerned, I'd like to live through one Thanksgiving without a turkey. I've had to eat one every Thanksgiving since I can remember, and the novelty of not having

"Darling," she said, "I've been trying to figure out one good reason for marrying you since our wedding day."

to will be a welcome relief. Besides, Thanksgiving down here doesn't seem to call for a turk. And we still have the smoked shoulder we'd planned on.

And Imogene smiled in prodigious happiness and began re-wrapping Uncle Rufus's turkey. "Darling," she said, "I've been trying to figure out one good reason for marrying you since our wedding day. And now I've found it." Whereupon she kissed him and Tony held her tight in his arms.

And so they marched over to the Santrells and undid the package on Mrs. Santrell's kitchen table and watched with a curious tugging at their hearts as the eight Santrell children and the two grown-ups stared and stared at the great fat bird. They left very soon after that because Mr. and Mrs. Santrell seemed to have difficulty in finding adequate words to express themselves.

They raced up the walk of their little stucco bungalow—and stopped dead still on the veranda.

A great package reposed before the front door, and a letter lay atop the package.

Tony picked up the letter, stared at the package curiously and tore open the envelope. "Dear Imogene and Tony," he read. "Your Uncle Rufus wouldn't like it a bit if he knew I was doing this. You know how he disapproved when you two got married and went away down South. However, I know you must be lonesome and rather discouraged, and so, under separate cover, I'm sending you a turkey for your Thanksgiving dinner. Please don't acknowledge its receipt, as your Uncle Rufus might read the letter and I'd never hear the end of it. Love to you both, Aunt Sara."

THUS, WITH EACH WOMAN DOING HER SHARE, A JOB TOO BIG FOR ANY ONE PERSON TO CARRY OUT ALONE IS SUCCESSFULLY ACCOMPLISHED THROUGH FRIENDLY COOPERATION.

THROUGHOUT OUR HISTORY, THE LIVES OF OUR PEOPLE HAVE BEEN ENRICHED BY THE SPIRIT OF WORKING TOGETHER TOWARD COMMON GOALS. ONE OF THE GREATEST EXAMPLES OF ACHIEVEMENT THROUGH COOPERATION IS OUR OWNERSHIP OF LIFE INSURANCE, WITH MILLIONS OF AMERICANS POOLING THEIR FUNDS AND SHARING THEIR RISKS IN ORDER TO PROVIDE FAMILY PROTECTION AND SECURITY THAT THEY COULD NOT ATTAIN ALONE.

## Ark

## Search Is Abandoned

DOGUBAYAZIDI, TURKEY.—The hunt for Noah's Ark by an American expedition has been abandoned. The search was called off after 12 days of fruitless search on Mount Ararat.

But, Dr. Aaron J. Smith, retired missionary from Greensboro, N.C., who led the search, thinks the wooden ark which the Bible says rode out the great flood, is still hidden somewhere on the rocky, three-mile-high mountain.

"We have cleared the way for future expeditions," Dr. Smith declared. "We expect other missions to complete the job we have begun."

Smith headed a group of five Americans who were escorted by Turkish soldiers over crags and through drifts of volcanic ash. The others were Walter Wood, Sea Cliff (N.Y.) development engineer; Wendell Ogg, Knoxville (Tenn.) physicist; E. J. Newton, Colfax (N.C.) interior decorator, and this correspondent.

Every part of Mount Ararat was searched, including the five mile plateau extending between the main mountain and small Ararat peak.

## Newest Super-Rocket Gives Science Idea Of Space-Ship Needs

LAS CRUCES, N. M.—Although America's newest super-rocket soared only 33 miles into the air, it was said to have given science a picture of what the first interplanetary space-ships may be like.

On the basis of the performance of the Viking II in a test flight when 95 per cent of all its intricate gadgets worked, the moon express of tomorrow may look like a pencil: thin, round and as high as a modern office building.

Strangest of all, it probably will not have any fins.

The 46 foot long Viking II, largest yet produced in the United States, was controlled in flight by changing the direction of the exhaust from its rocket tubes. It is equipped with fins, but they were not used.

"We eventually hope to eliminate fins entirely," says Dr. Homer E. Newell, rocket expert in the naval research laboratory at White Sands proving ground near here. "The drag on fins at extremely high speeds is tremendous."

The Viking II reached a speed of 1,775 miles an hour and an altitude of 33 miles. Its predecessor's top speed was 2,250 m.p.h. and it soared to a height of 50 miles. However, Newell termed the latest flight a success.

"We were after stability and control this time," he said. "Next time we will concentrate on engine performance."

In the test the fuel of liquid oxygen and alcohol burned for only 49 seconds, although there was enough for 65 seconds. The first Viking burned through 53 seconds of a similar load. Failure of the rockets to consume their full fuel loads has not been explained.

The navy plans to fire a total of 10 Vikings in its current research program, designed to study cosmic rays and the upper atmosphere as well as to improve guided missiles and to aid in the construction of future aircraft.

## Steel's Greatest Decade

During the 1940's about 800 million tons of steel were made. Steel employees were paid \$17 billion. The industry spent about 3.2 billion dollars for expansion.

## Operation Okinawa

During their first month of operations from two airfields on Okinawa, marine fighter pilots knocked down 209 Jap planes while losing only four in aerial combat.

## Child Training

Children should be made to feel as free as adults to invite their friends to their houses. This will help to develop invaluable social traits, such as hospitality and friendliness.

## Venezuela

Venezuela was the largest customer of iron and steel exports in South America, taking 30.6 per cent of the 1,140,621 tons sent to that continent.

## John Dory

The John Dory, a popular food fish which lives in tropical seas, has a round black spot on the middle of its side. Legend has it that this spot is a thumbmark left there when St. Peter took a coin from the fish's mouth.

No Weather Worries!

with an Automatic  
GAS Clothes Dryer

Let it rain... or sleet or snow. When you have an automatic gas clothes dryer any day is wash day. No more postponing laundry because of the weather... no more rushing out to rescue clothes from a sudden shower. You simply take clothes from the wringer or spinner and toss them into the dryer... set the time control and just minutes later take the laundry out dry.

The fluff-drying action of a gas clothes dryer means less ironing for you, too. Towels, pajamas, tee shirts and the like dry soft and wrinkle-free. And as clothes are tumbled dry they're bathed in healthful ultra-violet rays by a special lamp. Ozone is released at the same time to give the laundry that sweet-as-clover freshness.

## 30 Day Trial Offer

Try a Gas Clothes Dryer in your own home for 30 days... If you are not completely satisfied you may return it and your 10% down payment will be refunded. This offer for a limited time only.

10% down and as long as 24 months to pay the balance with your Service bill.

## HUMAN ECHO

Man Displays  
Weird Faculty

SPOKANE, Wash.—Did you ever try to talk to a man who could say—even as you were saying—the very things said? That would be a trying experience and, when talking to Ronald Severson, a lock-and-safe-salesman, it is a trying experience, for he can do just that very thing.

Ever since he was seven years old, he could do the trick, and ever since he has been going around having the last word with everybody. He can talk, sing or yodel right along with anyone, no matter what language is used, from French to Norwegian, from pig latin to tobacco auctioneer.

"I don't know how I picked it up," he says. "I guess it was just a kid trick. But it didn't go over too well with my folks after the first few times, so I didn't get too much practice at home."

Severson tells how it used to be great sport during high-school assemblies to talk right along with the guest speaker from his seat in the audience.

## Principal Not Amused

"That is, it was sport until the principal decided to let me sit in the office whenever we had an assembly," he grinned.

Psychiatrists and neurologists shake their heads in bewilderment when this 33-year-old human echo "gives 'em the words," as he puts it. They offer all sorts of explanations, for example, "You have a short cut between your hearing and speaking organs; you are gifted with mental telepathy."

"But then they say those things are impossible and they don't know how I do it," Severson says. "I think I just have extra sharp hearing."

One of his favorite gags is to get himself picked for one of those audience-participation radio shows where the master of ceremonies considers himself capable of coping with anybody.

## Puzzles Engineers

"The first thing that usually happens when I start talking along with him is the quickened interest of the engineers. They think they are getting a feedback and go nuts trying to find it."

When Severson was single, women were his favorite victims.

"First they'd get nervous, then they'd get flustered, then some would get hysterical until tears streamed down their face as I talked along with them. Invariably they would swear I was reading their mind. Unfortunately, I couldn't."

Severson proudly claims to have steered at least four drunks back onto the path of sobriety.

"I give 'em the business when they're pretty far gone and you'd be surprised how quickly they swear off for at least that night," he says. "But then sometimes I'll talk along with a drunk and he'll whirl on the bartender and accuse him of slipping him a Mickey."

Woman Operates Ranch,  
Has Time for Hobbies

LODGEPOLE, S. D.—Operating a 1,500-acre ranch normally is considered a man's-size job, but Helen Knudson takes it in stride and still has time for two hobbies—painting and plant care.

She has been ranching alone in the northwest corner of South Dakota since her husband died 18 years ago. And although neighbors lend a hand on occasion, she has a reputation as being "her own best help."

She also is known as an "excellent cook and No. 1 housekeeper."

Hauling hay, fencing, taking care of 100 head of sheep and 35 head of cattle, as well as planting and harvesting crops, are all in the day's occupation for the woman rancher.

Her ranch, fenced and cross-fenced with woven wire, is divided into seven pastures which permits rotation and control of sheep grazing.

Six years ago she broke her leg while trying to stop a runaway horse. This, she admits, slowed her down. But her friends contend it still would take a good man to get as much work done as she finds time for.

Mrs. Knudson came to the West river country with homesteader parents in 1910.

Electrical Device Plays  
Good Game Tic-Tac-Toe

SAN FRANCISCO.—An engineer has invented an electrical device, complete with 32 telephone-type relays, which won't solve any of the world's great problems, but which plays a good game of tic-tac-toe.

Robert Haufe described his invention at an American Institute of electrical engineers convention. The gadget, Haufe said, plays tic-tac-toe against a human opponent and wins every time or forces the opponent to a draw—except there's a catch, maybe to please human vanity.

Pushing a built-in switch is guaranteed to throw the machines a bit off its usually relentless electrical stride, enabling a skillful human opponent to actually win, occasionally.

SHORT STORY  
The  
Capturo

By Richard Hill Williford

SHERIFF Sol Rock cautiously approached the cabin and knocked three times. A bolt slid back into its socket. The door swung open and a voice came out into the night.

"That you, Sol?"

Sol sighed in relief.

"Hello, Baldy," he said, stepping inside. "What luck?"

"None," Sol heard Baldy fishing for a match, and he said. "Wait a minute, Baldy I got a scheme I want to work out."

"They've seen me," Sol went on. "Joe and Slim. They've been trailing me all day. I just kept far enough to avoid trouble."

"Avoid trouble? You?" Baldy's voice sounded incredulous. And Sol chuckled.

"Listen, Baldy, we've been chasing these two bad men for more than a week now. I'm sick of it. And now that we've found them, I don't aim to let 'em get away."

"So that's why you ran away from them?" sarcastically.

"Don't be a fool. I wanted 'em to follow me. They'll be along any time now. I made sure they saw me ride down in here by silhouetting myself against the skyline 15 minutes ago. Now here's the point: They don't know about you, yet. They think there's only me to contend with. And unless I miss my guess, they aim to get me out of the way tonight."

"Unless I stop 'em," said Baldy.

"Right. Now get this; I'm leaving you here alone, see? Cover the windows and then light up. They'll think it's me inside here, all unsuspecting."

"Fine," said Baldy. "But what's wrong with me being on the outside and you on the inside?"

Sol laughed shortly. "A lot, you little squirt. Now pipe down and obey orders. I'm going."

Instantly he grew tense. Every muscle and nerve and fibre became alert. He half crouched, half stood in his hiding place. And as he watched the cabin a dim figure took shape and became a man. Another appeared beside the first.

They lingered only a moment, then began stealthily to approach the door. Sol stepped silently from his hiding place. At the very instant that one of the figures crouched to thrust his weight against the door, he spoke out of the darkness.

"Reach toward the sky, boys! Drop those guns, and turn around. The jig's up. We got the drop on you!"

SOL QUICKENED his footsteps. In the darkness he stumbled, regained his feet and came on. At the moment he went down an orange lance of flame streamed out of the blackness near the cabin. It was followed by another.

But before the two bandits could shoot again, the two six-guns in Sol's hands thundered.

Answering shots came from the cabin. Sol felt a searing pain in his left shoulder. His senses began to reel. And suddenly he realized that the renegades had accomplished what he had been unable to do because of his stumble. They had fired at the flash from his guns—high—hoping for a kill.

This was Sol's last thought.

When Sol returned to consciousness he found himself lying on a bunk in the cabin. Baldy, grinning

"Reach toward the sky, boys! Drop those guns and turn around!"

broadly, was standing over him.

"What the hell did you blow out that light for?" Sol wanted to know.

"It spoiled my aim, made me stumble and nearly go me killed."

"Thought it would," Baldy grinned. "Wanted it to. You didn't think I was going to be fool enough to open the door and stand in the light so those birds could take pot shots at me?"

"Well what happened, anyway?"

For answer Baldy pointed across the room. Sol looked and saw two men lying there, both bound securely.

"Wing 'em?" Sol asked.

"Winged nothing. I whacked 'em over the head from the doorway while they were shooting at you. By the way, you almost hit me with your own wild shooting."

"Wish I had," Sol grinned. "Say, squirt, you ain't so dumb as you look!"

"And I ain't so much of a squirt, either," Baldy replied indignantly.

"Fact is I blew out that light just so's I could show you what a big feller I was."

HEALTH HINTS  
for LIVESTOCK  
PREPARED BY  
AMERICAN FOUNDATION FOR ANIMAL HEALTHNEEDLES REQUIRES  
EXPERT HANDLING

Properly used, the vaccinating needle can be a good friend of the livestock producer. For many years this instrument has been saving the lives of countless millions of persons and domestic animals.

But improperly used, the vaccine needle or hypodermic syringe can be a vicious enemy to livestock production. In the hands of untrained or careless persons, it may spread dangerous diseases and actually do more harm than good.

Anaplasmosis, hog cholera, swine erysipelas, swamp fever, malignant edema—all these "bad" diseases can be spread among farm animals by improper use of the vaccinating equipment.

Very often, unskilled persons are not acquainted with contamination risks and livestock may die of infections accidentally transmitted from animal to animal through the medium of contaminated needles.

One serious outbreak of anthrax in a southern state, not long ago, was traced directly to improper vaccination by an untrained person who did

not know the necessary precautions.

One danger is the "carrier" animal—one that carries disease germs, yet appears to be healthy. A needle pushed through the skin of such an animal, and then used on other stock, can pass disease on to all the rest of the herd and cause serious losses.

It can spread disease as well as prevent it.

There are other risks, too. Are the animals in good enough health to be vaccinated without ill effects? Is the vaccine still potent enough or has it deteriorated? What is the proper dosage? Professional answers to these questions, and professional skill in the actual vaccination, are the keys to safe and effective use of vaccine to prevent livestock diseases.

AN ORDINANCE CONCERNING  
CHILDREN ON STREETS AT  
NIGHT

BE IT ORDAINED BY THE PRESIDENT AND BOARD OF TRUSTEES OF THE VILLAGE OF ANTIOCH THAT:

SECTION 1. CHILDREN ON STREETS AT NIGHT. It shall be unlawful for any child under the age of sixteen years to be upon any public street in the Village of Antioch between the hours of 10:00 p. m. and 6:00 a. m., unless accompanied by or in charge of a parent, guardian or other proper companion of the age of 21 years or more, unless engaged in some occupation or business which such child under the Statutes of this State may lawfully engage in.

It is hereby made unlawful for any parent, guardian, or other person having the legal care and custody of any person under 16 years of age to allow or permit any such

child, ward or other person under such age to go, or be in, or upon any of the streets, alleys or public places in said Village within the time prohibited or unless accompanied as herein provided, in the last preceding paragraph of this Ordinance, unless there exists a reasonable necessity thereto.

SECTION 2. NOTICE TO VIOLATORS. Any child under the age of 16 years who shall violate any of the provisions of this Ordinance, shall be warned by any police officer forthwith to comply with such provisions and such officer shall also, without delay, report such violation to his superior officer, who shall cause a written notice to be served upon the parent, guardian, custodian or other person in control or charge of such child, setting forth the manner in which this Ordinance has been violated. In case any child under the age of 16 years, after such warning, shall again vio-

late any of the provisions of this Ordinance, such child shall be apprehended as a juvenile delinquent and the offender shall be brought before the County Court of Lake County to be dealt with accordingly.

No child or minor person arrested under the provisions of this Ordinance shall be placed in confinement until such child has been taken home to ascertain the parent's wishes and the parents shall have refused to be held responsible for the observance of this Ordinance.

In case any parent, guardian, custodian or person in control, or charge of such child who has received notice as provided herein, shall knowingly permit such child again to violate the provisions of this Ordinance, such parent, guardian, custodian or person in control or charge of such child shall be held to have violated this Ordinance.

SECTION 3. PENALTY. Whoever shall violate any of the provisions of this Ordinance shall, upon conviction thereof, be fined not less than Five (\$5.00) Dollars nor more than Two Hundred (\$200.00) Dollars for each and every offense.

CHRYSLER

TODAY'S NEW  
STYLE CLASSIC

Antioch Servicenter -

Route 21 & 173 - Antioch, Illinois

**Holdup****Victims 'Touch' Robbers**

CHICAGO.—The next time these particular holdup men choose their victims, they'll probably inquire if the objects of the robbery are salesmen—for two Minneapolis salesmen said here they talked \$1.50 out of three would-be robbers who held them up and abducted them.

The gunman accosted Stephen Dineen, 28, and Marshall Morissette, 32, and forced them to the curb as they drove through the north side of Chicago.

Morissette said he managed to slip \$750 from his pocket and stuff it behind the seat cushion in his car.

"They searched us down to the skin, but we didn't have a dime," Morissette said. "I told them we had lost all our cash in a gambling joint."

As the gunman searched them, the two salesmen talked fast, "selling them" on the idea that they were broke. Finally, as the robbers were about to let them go, Morissette asked for carfare. One gunman gave them 50c and another handed them a dollar, saying "Take a cab."

Back at his own car, Morissette found the \$750 safe.

**NORTH AFRICA****Old Legends Playing Out**

ALGIERS, Algeria.—North Africa is getting pretty tired of the old "thousand-and-one-nights" stuff. In fact, it's rather well played out in the territory.

For instance, there's hardly a harem left. Only a very rich pasha could afford one, and few can afford even more than one wife. And there aren't as many rich pashas these days as there used to be.

The blank walled, twisting streets of Arab cities still hide a private world of oriental charm, but the war, and the GI invasion left their marks.

The women are less tightly veiled than they used to be, at least in the bigger towns. Although most Moroccan women still show no more than one mascaraed eye and a henna tipped finger, Algeria has taken off the wraps. Advanced women in Algiers now wear dinky transparent veils, sometimes sewn with sequins. They use American nail varnish, carry smart Paris handbags and cram their feet into latest high heeled shoes. Some wear no veils at all.

**Sun Glasses Popular**

In the crowded markets, you can buy all kinds of relics of the war from a neat WAC uniform of summer tans to an old gray-green Italian uniform with a big "P.V." stamped across the back. Old post exchange supplies, from candy bars to shaving lotion, are on sale.

U.S. army type sun glasses are general wear for the smart set. Some women wear them over their veils, which gives a weird man from Mars effect.

Surplus jeeps and battered German army Volkswagens help the transportation situation and khaki army tents ease the housing problem. Old army stocks of DDT are sprayed twice a year on the sprawling, teeming slums made of old gas cans, grocery boxes and corrugated iron on the outskirts of the cities.

Police evacuate everyone during the twice yearly spraying, but the Arabs can't get used to it. They just can't understand what all the fuss is about.

**Furniture Modern**

Odd pieces of modern furniture give a bizarre effect among the piled cushions and divans of wealthier homes. A radio or a sewing machine seems a definite sign of social standing.

Movies and American soft drinks are all the rage among the younger generation.

Most popular movies are those from Egypt. Most are romantic musicals and almost always feature a night club scene and a singer. The Arabs go to them again and again to hear the music. To the women of French north Africa, the unveiled Egyptian women of the movies represent the very height of elegance.

After the Egyptian musicals, Hollywood westerns are the most popular. Lavish oriental productions such as "Ali Baba" and "The Thief of Bagdad" still draw big crowds, but few Arabs understand French.

**Library of Congress Bans Further Literature Awards**

WASHINGTON.—Congress has moved to avoid disputes such as that over the Ezra Pound poetry prize by ordering the Library of Congress not to hand out any more literary awards.

Chairman Theodore Green (D., R.I.) who announced the decree, said his joint senate-house library committee would not investigate the Pound award, as had been demanded by a group of house members, but added that there would be no more such awards.

The now insane Pound, who is under indictment for war-time treason, received the \$1,000 Bollingen poetry prize for his "Pisan Cantos," which he wrote while held in a prisoner-of-war camp in Italy for broadcasting for Mussolini.

Librarian Luther H. Evans announced later that he is canceling all prizes and awards. Besides the Bollingen award, the Library had given the Elizabeth Sprague Coolidge medal for "eminent services to chamber music," and three awards in connection with the annual exhibition of prints.

**Crippled Farmer Defrauded By Carnival Soothsayer**

GREEN BAY, WIS.—The stories of persons fleeced of savings while on fruitless search for treasure, or to escape witchlike curses, continued to increase.

The latest episode was reported by a 70-year old crippled farmer who said he had been defrauded of his life savings in a futile hunt for "buried treasure" on his land. He estimated his loss as approximately \$2,000.

He swore out a complaint in municipal court against a woman. He said the only name she gave him was that of "Mary." She told him fortune, he said.

He told police that he met the woman at a carnival. She asked him if he ever saw lights over his farm. Sure enough, he said, he did. "That means buried treasure," she said. He paid her \$1,400, he reported, to hunt for treasure, \$500 to "find the exact location," and \$250 to remove the "curse" which she said prevented discovery.

"Mary" promised to return in three weeks—but she didn't.

**LIVESTOCK HEALTH ODDITIES****Effects of Erosion**

The dictionary defines erosion as the wearing away of soil by water. Erosion's effects are evident everywhere—mud-laden rivers swelling up over their banks, hillsides etched deep with ditches, busy dredges sucking silt from harbor bottoms. Erosion's inroads in the topsoil of the United States, on which 140 million Americans rely for food and fabric, have been severe.

**Heartwood, Sapwood**

Heartwood and sapwood Douglas fir of equivalent character are of equal strength. No requirement of heartwood need be made when strength alone is the governing factor. A heartwood is more durable than sapwood and should be specified if the wood is to be exposed to decay producing conditions. Sapwood of Douglas fir takes preservative treatment more readily than heartwood, and is equally durable when treated.

**Concrete Pipe**

Although shrinkage cracks may develop in exposed concrete pipe, these small cracks will heal themselves in the presence of moisture and in fact become stronger than before the break. The reason: concrete in the presence of moisture exudes calcium hydroxide, which upon exposure to the atmosphere is converted to calcium carbonate which seals the cracks and prevents rusting of the metal reinforcement.

**Crossing "The Channel"**

A novel two-way airlift service saves time for motoring tourists traveling between Britain and France. The motorist drives his automobile onto the air field where the car is run up a sloping gangway into the nose of the specially designed aircraft. The motorist rides in the same plane with his auto and drives off the landing field on his arrival in France.

**THE ANTIOCH NEWS**

928 Main St.

Antioch, Ill.

**COMING OR GOING...****SMARTER THAN EVER...****AGAIN THIS YEAR THE BIG VALUE IS DODGE!**

You could pay a thousand dollars more and still not get all the new beauty... extra room... famous ruggedness of this great new Dodge

HERE'S BIGGER VALUE in smart new styling... in ease of handling... in comfort... in sound engineering. And in actual dollars and cents, too, because the big new Dodge costs just a few dollars more than the lowest-priced cars.

Despite its smart, low, graceful lines outside, Dodge is higher, wider, longer on the inside to give you the roominess that spells solid comfort... that means extra room for your head, your legs. Less overhang front and rear makes parking and garaging simpler, easier.

See this great new Dodge. Sample the flashing performance of the powerful high-compression "Get-away" Engine... the smoothness of Dodge Fluid Drive. Come in today.

NEW BIGGER VALUE

**DODGE**

Just a few dollars more than the lowest-priced cars!

**NEW VALUE!** You'll thrill to the smoothness of Dodge Fluid Drive. Gyo-Matic, to free you from shifting, optional on Coronet models at moderate extra cost.

**Ingleside Motors, Inc.**

## PEAK CLIMBER

Californian  
Holds Record

SANTA BARBARA, Calif.—A retired, real estate man is the first person ever to climb the 67 highest peaks in the United States.

He is John D. Graham, an athlete 53, who claimed the record after scaling North Pikes Peak in California, and Grizzly Peak in Colorado in a one-week expedition.

His goal for 15 years, Graham said in an interview, has been to conquer every U.S. mountain higher than 14,000 feet. He listed 67 such peaks. The World Almanac lists only 62.

He has clambered up all 14,000 footers in Colorado, California and Washington, Graham said, the only states in which the giants are located.

## First Ascent in 1935

He tackled his first mountain during a Colorado vacation in 1935. It was small, but the experience was a challenge.

"It gave me an unusual feeling to be able to see such great distances and such inspiring scenery," he said.

Originally from New York city, Graham had a chance to hike to his heart's content when he moved to Colorado. He said that while he lived in Colorado Springs and Denver before World War II he became the eighth person to climb all 62 of the 14,000 foot peaks in that state.

"Mountain climbing finally gets to be a competition and a challenge," he said. "It's the same feeling of accomplishment you notice after a good score in golf. You match your skill, strength and endurance against the mountain, which can really throw out the obstacles."

## North Pikes Peak Toughest

His toughest ascent, Graham said, was his last—North Pikes Peak, a 14,254 footer near Big Pine, Calif. He made it in July, before winter snow and ice had fully melted.

Approaching with his party from the north, he crossed the Pikes Peak glacier, the most southerly active glacier in North America. They crossed the Bergschrund, a crevasse in the snow field at the head of the glacier, on an ice bridge. Using ropes and ice axes most of the way, it took them 10 hours to reach the summit.

The descent on the south side was slower. It was getting dark. Graham paused on a narrow cliffside ledge to fasten a rope. A second later he heard a roar and an avalanche of rock and snow tore down the mountain directly in front of him. A huge boulder whizzed by his head. The pause had saved his life.

Russians Claim It Was  
They Who Invented Tank

MOSCOW.—The Russians were at it again—claiming discoveries made by other countries. This time Pravda, official publication of the Soviet government, claimed the Russians invented the military tank a year and a half before the fighting machine appeared in Britain.

Not only that, was the claim, but Russians now have created tanks that have no equal anywhere in the world.

The articles were published as the Soviet Union celebrated "tank day." As a further observance of the day, all papers published large portraits of Prime Minister Stalin and the text of an order of the day by Alexander M. Vasilevsky, armed forces minister. This order demanded new successes in the development of armored and mechanized armies.

The article in Pravda, the Communist party's organ, was written by Semyon Ilyich Bogdanov, marshal of armed forces. It said:

"The facts show that the first tank designs appeared in Russia considerably earlier than people started to work on these questions abroad, and the first models of Russian built tanks were constructed a year and a half earlier than similar machines appeared in Britain."

He said the date the first tank was made in Russia was May, 1915.

Ballroom Hula Requires  
No Grass Skirt Routine

CHICAGO, ILL.—In the first place, a ballroom hula doesn't require a grass skirt, yet, to be a big boy on a ballroom floor these days, one has to know how to do the hula. The Chicago national dancing master's association is authority for the statement.

Despite its name, the association is composed of hundreds of dancing instructors from all over the United States and Canada.

All of them are practicing what they call the "ballroom hula" so they can teach it to their customers. They don't say you have to wear a grass skirt to do it, but even in a nice, conservative suit, undulating hips are going to look odd if they are undulated by, say, a businessman who has eaten not wisely, but too well—and whose contours show it.

Howard Turner, of Tulsa, Okla., says jitterbugging must still be contended with, only they are calling it "swing" again.

Ballroom devotees might as well be on the lookout for the "shuffle-board shuffle," the dancing maestros say, but none had the courage to explain just what it is.

## MILLBURN

Regular church services on Sunday, Jan. 8, with Sunday school at 10 o'clock and worship service at 11 o'clock.

The January Committee of the Ladies Aid will serve the annual chicken pie dinner at the church Saturday, Jan. 7, at noon. A business meeting will be held at 2 o'clock in the church parlor.

The annual meeting of the Millburn Mutual Insurance Co., will be held in the Masonic hall Saturday, Jan. 7, at 10:30 o'clock.

The annual meeting of the Millburn Cemetery Association will be held in E. A. Martin's store Monday, Jan. 9, at 1:30 o'clock.

The Millburn O. E. S. will sponsor the regular monthly card party at the Masonic hall Saturday evening, Jan. 7.

John Clark spent the past week with his sister, Mrs. Ray Hauser at Stephenson, Mich.

Mr. and Mrs. Ed Hoffman and sons were dinner guests of Mr. and Mrs. Ed Druce in Grayslake Tuesday.

Mr. and Mrs. Clarence Hauser, of Paris Corners, spent Monday afternoon at the Frank Hauser home.

The J. S. Denman family, Mr. and Mrs. Ralph McGuire, Lloyd Atwell family, the Ed Denman family, the W. S. Denman family spent Wednesday evening with Mrs. Minetta Bonner in Grayslake.

Mr. and Mrs. Edward Sundin and daughters, Delores and Lynn spent Sunday and Monday in Chicago.

Cpl. Duane Weber of Scott Field spent two weeks with his parents, Mr. and Mrs. C. P. Weber.

Mr. and Mrs. Robert Bonner, Mr. and Mrs. Jim Bonner, of Kansasville,

Mr. and Mrs. Russell Doolittle and son, Tommy, of Antioch, Mr. and Mrs. Gordon Bonner, the Howard Bonner and Roy Bonner families were supper guests at the Will Bonner home on West Grand Ave., Grayslake Sunday evening.

Mr. and Mrs. Leslie Bonner were dinner guests at the home of Mr. and Mrs. Victor Strang Sunday.

Mr. and Mrs. Henry Rose, Mr. and Mrs. Walter Makufte and daughter and Mr. and Mrs. Wm Goellner and son, of Chicago, were supper guests at the Herbert Messner home.

Rev. and Mrs. L. H. Messersmith spent three days in Chicago attending the annual state meeting of Illinois Educational Association at the Sherman Hotel, Dec. 28 to 30.

Milton Smith returned to his home in Wichita, Kansas, after several days visit with his grandmother, Mrs. Myrtle Savage.

Albert Smith, Ed Jones and Jim Cunningham have returned to Champaign, Ill., after spending the holidays at their respective homes.

Mrs. Ethel Saunders, who has spent the past two months with her son, James Saunders in Redwood, Calif., is visiting her daughter, Mrs. George DeYoung.

Mr. and Mrs. Don Truax entertained their card club at their home New Year's eve.

Mr. and Mrs. Harold Yukel, of Chicago, spent Monday at the Strohal and Lucas homes.

Mr. and Mrs. Frank Edwards were dinner guests at the John Edwards home in Libertyville Sunday.

Mr. and Mrs. Harold Pullen and family spent Monday afternoon at the David Pullen home in Zion.

Mr. and Mrs. Eric Anderson and daughter, Rebecca and Mrs. Anna Bauman left Saturday morning by auto for two months vacation in

the south and west. Mrs. Kenneth Denman is substituting for Mrs. Anderson in the lower grades at Millburn school. Mrs. Sophrona Murrie, of Wadsworth, is staying at the Anderson home during their absence.

There will be a Pilgrim Fellowship rally for young people of Lake County at Millburn church Sunday evening, Jan. 8.

Mr. and Mrs. Lynn Bonner were dinner guests of Mr. and Mrs. Ellis Gott in Waukegan Sunday.

Rev. and Mrs. L. H. Messersmith were dinner guests at the E. A. Martin home Monday evening.

Mr. and Mrs. Wallis Hines and sons, of Aurora, Ill., and Mr. and Mrs. H. M. Johanningmeier, of Plainfield, spent Sunday with their parents, Mr. and Mrs. D. H. Minto.

Mr. and Mrs. Oscar Neahous spent New Year's Eve with Mr. and Mrs. Chris DeYoung.

Elmer and Glenn Hauser spent several days with their brother, Ray Hauser and family at Stephenson, Mich. Mrs. Elmer Hauser spent the weekend with her parents, Mr. and Mrs. Orville Hairrell in Waukegan.

Mrs. Myrtle Savage, Miss Josie

## What Can The People Believe?

When the anti-trust lawyers in Washington filed their suit to put the A&P out of business, they immediately handed out for all the newspapers of the United States a story giving in detail their "allegations" against this company.

When we published advertisements giving our side of the case, they protested, even though they had made, and have continued to make, in newspapers, in speeches and over the radio these charges that would seriously damage our business, if they were believed by the public.

Every week millions of American housewives patronize A&P stores. Many of them would not want to deal with the kind of people that the anti-trust lawyers represent us to be.

We think we have a right to protect this 90-year old business which has made it possible for millions of American families to get more and better food for their money, which is providing high-wage employment for 110,000 Americans and which is helping millions of farmers to improve the methods of distributing their produce.

No answer by us would be necessary if the anti-trust lawyers were always right.

But they, like all other human beings, can be wrong.

In this case we know they are wrong.

They have been wrong before.

In case after case they made charges against A&P which were proved in court to be utterly without foundation.

We will prove that statement right up to the hilt.

The anti-trust lawyers tell the public that they won a previous anti-trust suit against us at Danville, Illinois. They did.

What they do not tell you is that they brought case after case against the A&P in federal courts all over the United States. Before they won this case they suffered three defeats.

The anti-trust lawyers have told everybody about the time that the courts said they were right. We think you are entitled to know about the three times the courts said they were wrong.

Now we are going to tell you about the first one. In future advertisements we will tell you about all of them.

## The Washington Bread Case

In April, 1941, the anti-trust lawyers brought a criminal suit in Washington, D. C.

They charged that the A&P, two grocery chain competitors, two labor unions and other good American citizens had conspired to fix the price of bread.

Can anyone imagine any charge calculated to be more damaging to a retail grocery business? They asked millions of people to believe that we were the kind of grocers who would take bread out of the mouths of poor people and make it harder for a wife and mother to feed her family.

These charges were false.

In that case it developed that the A&P and the two competitors who were charged with conspiring with us to maintain high bread prices actually sold bread cheaper than most of the other stores in Washington.

The anti-trust lawyers presented and argued their case. When they were through, Federal District Judge Allen T. Goldsborough ruled that A&P and the other defendants did not even have to put in a defense. He ordered the jury to bring in a verdict of "not guilty."

Judge Goldsborough said to the anti-trust lawyers:

"If you were to show this record to any experienced trial lawyer in the world, he would tell you that there was not any evidence at all."

"Honestly, I have never in my over forty years' experience seen tried a case that was as absolutely devoid of evidence as this. That is the honest truth. I have never seen one like it."

So here was a case in which the anti-trust lawyers made seriously damaging charges against the A&P, in support of which, in the words of the court, they did not have "any evidence at all."

This was not the only time the anti-trust lawyers made charges against the A&P which the courts said were not true. In future ads we are going to tell you about these other suits. We are not going to duck, either. We are going to tell you about the criminal suit that the anti-trust lawyers won at Danville, Illinois.

The anti-trust lawyers say that they are not attacking "bigness" or efficiency. They have to say that because the courts have decided that "bigness" and efficiency and selling at low prices is not a crime.

But the fact is crystal clear that they only brought their bread suit against the big companies and against companies that sold good bread at the lowest prices; just as in this current suit they are attacking a big company, that sells good food cheap.

We are going to show the American people that the suit to destroy A&P is really a suit against efficiency and against real competition.

The real question involved in this suit is whether businessmen are going to be encouraged to do a better and more efficient job; or whether we are going to let the anti-trust lawyers in Washington blow the whistle on anybody who gets big by giving the people more for their money.

No one can make us believe that it is a crime to try to sell the best quality food at the lowest possible price.

Intercity Freight Railroads in the United States handle approximately 69 per cent of all intercity commercial freight, 73 per cent of all intercity passenger traffic, 99 per cent of all intercity United States mail, and nearly all of the country's commercial express traffic.

## Radioactive Ore Is Found In Old Gold Rush Section

MARIPOSA, CALIF.—An atomic scientist has reported the discovery of radioactive ore of unknown quantities in the heart of the mother lode region where the gold rush in 1849 brought wealth and fame to California.

Dr. Frank Tiffany, radiation expert and former civilian atomic scientist at Albuquerque, N.M., said he found a uranium vein of undetermined depth and which measured 400 feet long and eight inches wide in the High Sierra country near Yosemite national park. Dr. Tiffany said the uranium ore, a source of atomic energy, would run as high as 8 per cent.

The find was made on government property. Dr. Tiffany reported that at two or three feet the intense radiation almost killed his Geiger counter, a basic instrument used to detect the presence of radio activity.

## Russian Brown Bear Smarter Than Brown Bears of America

MILWAUKEE, WIS.—If you were asked, which would you say is smarter—the black bear found in the United States or the Russian brown bear?

Two brothers, who have trained a Russian bear to box with a man and a black bear to ride a motorcycle 40 feet above the ground, believe they have the answer.

Every time, they say, the Russian bear will come up with the higher intelligence quotient. Authorities for this statement are Willie and Gustave Walldorf of Oak Ridge, N. J. They have been handling bears in Europe and the United States. They learned their business working with their father in European menageries.

The Walldorfs had their boxing bear in an act at the Wisconsin outdoor exposition. Gustave got into a steel cage with 500-pound August—that's the bear's name—although on the stage he's "Terrible Terry." The two boxed three rounds.

The Walldorfs didn't have their motorcycle riding black bear with them, but it was almost ready for professional appearances. It climbs a 40 foot ladder alone to the elevated platform and jumps on the bike.

"Your black bear is more nervous, more excitable and more fearful than the Russian brown bear," Willie asserted, as Gustave nodded in agreement. "The brown bear is much smarter, too."

"Of course you find unusually smart bears in every species and some black bears may be smarter than certain brown ones, but we have found that on the average a brown bear can be much more easily trained than the black."

The Walldorfs claim that August is the only boxing bear in the world. August has been throwing rights and lefts in the ring for 17 years. He's 23 now. That isn't old for Russian brown bears, which often live to 45 or so, Willie said.

## British Jet Engine Said To Enable Vertical Climb

LONDON.—British science is reported to have developed a new jet engine so powerful that warplanes using it can climb vertically, like rockets.

An authoritative but non-official source described the new power plant as "having more than twice the thrust of engine now in regular production and use."

Its exact performance and details were still secret, but one qualified source said it developed a thrust well above 10,000 pounds. Most British jets now in service have rated power of 5,000 pounds, which the American Allison "400" develops 5,500.

For the first time, this source said, it will be possible to give normal fighter planes more power, expressed in pounds of thrust, than their overall weight.

"There appears to be no reason why such planes cannot climb vertically like rockets, using the thrust of their jets to over-compensate their weight," said one expert.

## Reported Panther Believed To Be Big Newfoundland Dog

INDIANAPOLIS, IND.—Sheriff's deputies have reported that a phantom "panther" reported on the loose in southwestern Indiana apparently was only a big, black Newfoundland dog named Gypsy Blossom.

They called off a search which began when Mrs. Edna Lawson reported seeing a black panther escape from a circus car.

The hunt caused a split in police forces. City police quit searching before sheriff's officers who were convinced for awhile that a panther really was loose.

It was reported a short time later, however, by Clifford Chastain that his huge, black Newfoundland probably was the culprit. A resident of the area said Gypsy Blossom was as tall as a man when she stood on her hind legs and might easily be taken for a panther.

## SHORT STORY

## Benny Wisens Up

By Richard Hill Wilkinson

BENNY got a big kick out of eavesdropping on the sheriff. It smacked of adventure and the wild life he loved. He got a bigger kick when he heard Sheriff Conrad mention Slick Dearborn.

Slick Dearborn was the smartest outlaw with whom Conrad had ever had to contend.

He was Benny's idol, for he represented the dangerous freedom of which the boy had always dreamed. One day three weeks ago Benny had seen Slick in the Faraway Saloon, and something about the worshipful look in the youngster's eyes had attracted the outlaw's attention.

Benny had been almost speechless with gratitude when the outlaw spoke to him. They had a long conversation, and when it was over Benny knew a sense of importance that was almost the fulfillment of his dreams.

Ear glued to the side of the building, Benny held his breath while Sheriff Conrad and his deputy, Joe Hicks, carried on their low-voiced conversation.

At 4 o'clock that afternoon Benny drew rein in the secret canyon where Slick was hiding. He gave the secret whistle that he and the outlaw had agreed upon, then waited breathlessly.

Minutes passed and nothing happened. Benny moved down the canyon ways and whistled again. Suddenly two men emerged from behind a boulder. One of them was Slick Dearborn. Benny shouted at them.

"Slick, I just heard the sheriff and his deputy talkin'. They found out it was you who held up the bank last week, an' they're comin' to get yuh."

"You come with us," said Slick shortly.

"Nemmine keepin' guard," Slick called, and the other outlaw slid back to the ground. "We gotta get out of here and git fast. Kid, did anyone see you leave town?"

"No, sir. Not a soul. I done jest like you told me."

"Good. You're comin' with us." The second outlaw came from behind a screen of bushes riding one horse and leading another. Slick swung aboard the extra animal.

There came the sound of a shot. The second outlaw uttered a scream, clutched at his breast and

At four o'clock that afternoon Benny drew rein in the secret canyon where Slick was hiding.

plunged from the saddle. A second shot followed, and Slick's mount went to its knees.

Slick swore violently as Benny crawled up beside him. "You damned little rat! Thought you said nobody followed you out of town?"

"Honest Slick—" Suddenly Slick seized him around the middle and leaped out of plain view of the two coming up the canyon. The pair reined in, holding their fire as the outlaw, using Benny as a shield, began shooting rapidly.

Sheriff Conrad and Joe Hicks, sensing the bandit's purpose, flung themselves from the saddle and scurried for shelter.

Benny suddenly understood the purpose he was serving, suddenly knew that Slick was using him as a means of protecting his own hide.

"Slick! Slick! Lemme go. They'll blast me down in cold blood!" "Shut up, you rat!" Slick brought the barrel of his gun down crushingly on the boy's head. Benny gasped, struggled feebly, then went limp.

When Benny opened his eyes he found Sheriff Conrad and Joe Hicks bending over him. "Feeling better, kid?" "Ye-es. I'm all right. Where's Slick?"

"Taken care of," Sheriff Conrad eyed Benny intently. "Listen, Benny, you better get home before your maw begins to worry. You can say you helped us run down Slick Dearborn. Fact is, you did. When we saw you talkin' with him three weeks ago we figured somethin' like this, which is why we did some talkin' so you could lead us to where he was."

"Gosh!" said Benny. There were tears in his eyes. For the first time in his life he realized what a perfectly swell guy Sheriff Conrad was.

Released by WNU Features

## SIGHT RESTORATION

## TV 'Scanner' To Aid Blind

EVANSTON, ILL.—Restoration of sight to the blind by replacing their eyes with a television "scanner" is a project envisioned by a Northwestern university scientist. This "scanner" would be connected directly with the brain.

The same system, with other devices replacing the scanner, might enable the deaf to hear and some paralyzed persons to walk, the professor said.

Dr. Wendell S. Krieg, 43, who spent the past five years in brain research at Northwestern, said the basic theories for the plan have been well established, but that a "lot of work" remains to be done before the system would be ready for practical application.

Under his theory, electrical impulses, duplicating the normal nerve impulses involved in sight and hearing, could be conveyed to the brain by a series of electrodes distributed over the skull.

## Can Activate Muscles

Since muscles can be made to contract by direct electrical stimulation, "it should be possible to place permanent electrodes at motor points and activate the muscles whenever desired," he said.

"It is only a technological step to devise an appliance to scan the visual field in the same manner as a television scanner and to transmit that which is seen and recorded to the cortex (brain covering) in the same sequence and scanning pattern," he added.

To produce the sensation of hearing, he said, "it would seem possible to carry a series of terminals to the auditory area of the brain whereby separate tones in different combinations and sequences, could be applied."

He gave no estimate of how soon a practical test could be made of his beliefs.

(Commenting on Dr. Krieg's forecast, Dr. Ephraim Roseman, neurologist at General Hospital, said no one who is blind or deaf should become unduly excited at the prospect that he might regain his lost powers any time soon.

"Theoretically, the idea is possible, but it is impracticable in the present limits of our knowledge," he asserted.

## Making Dreams Possible

(It is possible by electrical stimulation of the brain to make a person see, hear, or even dream.

(Dr. Roseman said the electrical current is applied directly to one spot by a wire probing into the brain to obtain any of these effects. If the electricity must be directed into the brain from outside, it would spread, he said.

(A complication, he pointed out, is that while one spot receives a sensation from the eye, another spot interprets that stimulation. In other words, one might "see an object through the brain center and still not understand what it is.")

Krieg's theory is one of the first attempts ever made to cure the effects of blindness and deafness by passing the injured eyes or ears and carrying substitute electrical impulses directly to the brain.

## Campus Library Preserves Valuable First Writings

LOS ANGELES.—The original manuscript of Fabulous Boulevard, Ralph Hancock's story of Los Angeles' most famous street, has been deposited in the University of California's campus library—a stone's throw from the subject of the book, Wilshire Boulevard.

In a brief ceremony on the Westwood campus recently, author Hancock presented the typescript to librarian Lawrence Clark Powell. Also present were Robert B. Campbell, president of the American bookseller's association, and Neal Harlow, in charge of the special collections department.

"It is fitting that the original manuscript of this book should remain in the U.C.L.A. library where it can be made available to students of history and literature," Dr. Powell pointed out.

"Too many original manuscripts have been thrown away, lost or even used to start a fire in the fireplace. By placing a manuscript in the special collections department of the library it will be preserved for posterity."

The U.C.L.A. special collections department, under the direction of Harlow, was started several years ago to collect original manuscripts by western authors on western subjects.

## Marine Sergeant Enchants Dance Teacher into Corps

OKLAHOMA CITY, OKLA.—Marine technical sergeant Lester C. Bennett may be a ballroom "square" but as a salesman he wins in a waltz. Bennett, a clerk in the marine corps recruiting station here, was recently offered Arthur Murray's dancing course by a charming local instructress. For a mere \$192 Bennett could get hep in a hurry.

But while she was trying to sell him on the advantages of the rumba, Bennett sold her on the marine corps. In a few minutes, she signed up as a woman marine applicant. Wallflower Bennett kept his \$192.

## Truman Asks Editor Of Scottish Paper For Anthem Tracing

DUNDEE, SCOTLAND.—President Truman, according to a story in a newspaper here, has had his curiosity aroused as to the origin of his official anthem, "Hail to The Chief."

The paper, the People's Journal, published a picture of a letter addressed to the editor and signed, "Harry Truman." The Journal asked its readers to help out in the quest for information.

The letter quoted the President as saying he already had learned from the Journal one thing he didn't know, that the song was virtually pure Scotch. It said Mr. Truman would like to know more.

In an earlier issue, the Journal had reported that the tune of "Hail to The Chief" was said to "come from an old Gaelic air" and had found its way, somewhat changed, into Sir Henry Rowley Bishop's opera, "The Knight of Snowdon." Sir Henry, though born in London, taught in Scotland from 1840 to 1843, and his opera was based on a poem by Sir Walter Scott, a Scotsman.

The words to "Hail to The Chief" are from Sir Walter's poem, "The Lady of the Lake." They were supposed to have been sung by the followers of a Scottish chief, Rhoderick Dhu of Clan Alpine as they rowed him down Loch Katherine.

The letter from Mr. Truman quoted the President as saying a clipping of the original story had been sent to him by a Mr. Canaday of Cleveland.

"If you can furnish me with any information other than in your paper of the sixth, I shall be most happy to have it," the paper quoted Mr. Truman as having written.

"If any reader can throw light upon it," said the Journal, "the editor will be glad to pass it along to President Truman."

## Girl's Faith In Convict Wins Him Freedom In Court

BALTIMORE.—Because of a girl's faith in a man, he got out of jail, but he must make restitution of money obtained by forgery.

Criminal court judge Robert France suspended a 10-year prison sentence he had imposed on William J. Sansbury for forgery, placing him on probation for three years. The judge said he was suspending the sentence chiefly because of Peggy's faith in Sansbury.

The two met while Sansbury was an inmate of San Quentin prison where Peggy was an employee. They fell in love. When Sansbury was paroled he returned to Maryland to face two-year old forgery charges. Peggy took her life savings of \$600 and followed him here from San Francisco and pleaded for his release.

Her plea was so eloquent, her faith in Sansbury so vast that the man she loved got his freedom. But they must not marry for a year and Sansbury must pay back his forgery take. That was the judge's ruling.

## Pennsylvania Makes Claim To 'Kentucky Rifle' Title

LANCASTER, PA.—Pennsylvania has claimed the so-called "Kentucky rifle" as its own and thereby precipitated a storm of controversy in the Bluegrass State.

Pennsylvania hailed the gun's maker as one of the Keystone State's greatest pioneers. Kentuckians scoffed. "Tis true, they conceded, that it wasn't a Kentuckian who made the rifle, but it built its greatest claim to fame in the hands of pioneer Kentuckians like George Rogers Clark and Daniel Boone.

The Kentuckians went on to point out that if Pennsylvania wanted to be that way about the matter, they might as well call it the "Swiss rifle," inasmuch as a Swiss Menomone immigrant, Martin Meylin, made the first U. S. "long rifle" in a tiny storage shed near Lancaster in which he had set up a gun shop.

It all came about when Governor Duff, of Pennsylvania, proclaimed October 16 as "Pennsylvania rifle day," declaring that the state's "tremendous historical heritage" had been neglected.

Maurice Rohrbach, Swiss consul, in acknowledging Meylin's gun-making genius said he was "proud that one of my countrymen had helped the Americans to gain their independence."

Gen. Jacob L. Devers, former chief of the army ground forces, praised the development of the Pennsylvania rifle. He said the principle of the soft leather "patch" used in the early guns is still utilized in today's modern rapid-fire rifles.

After the unveiling of the plaque, a rifle made by Meylin—the only known one in existence—was given to the Lancaster county historical society by Martin B. Mylin, seventh generation descendant of the maker.

And so the Pennsylvania rifle came home to rest.
